100Mbps fiber optic connection to switch

Overview

Cisco FET-10G module The Cisco FET-10G Fabric Extender Transceiver supports link lengths up to 100m on laser-optimized OM3 or OM4 multimode fiber.

Key Takeaways

A 100 Mbps fiber optic connection typically uses a switch with 100BASE-FX SFP ports or modules. 100BASE-FX SFP OverviewA 100BASE-FX SFP is a Small Form-factor Pluggable transceiver designed for 100 Mbps Fast Ethernet over multimode fiber, usually operating at a 1310 nm wavelength and supporting distances up to 2 km depending on fiber type and link budget. It converts electrical Ethernet signals into optical signals, enabling stable full-duplex communication with strong immunity to electromagnetic interference, making it ideal for industrial, enterprise, and legacy networks.

Switch TypesSFP-Based Switches Switches with SFP ports allow the use of modular transceivers, including 100BASE-FX SFPs. These switches provide flexibility to mix fiber and copper connections and are scalable for future upgrades. They are available in both managed and unmanaged formats and can support industrial or commercial deployments.

Modular Enterprise Switches High-end switches like the Cisco Catalyst 6500 Series support 100BASE-FX modules, offering multiple 100 Mbps fiber ports with options for multimode or single-mode fiber. These switches provide high port density, advanced traffic management, and compatibility with SFP optics for flexible deployment.

Deployment Considerations

Fiber Type: Ensure the switch supports the fiber type you plan to use (multimode 62.5/125 µm or 50/125 µm, or single-mode). Distance: 100BASE-FX typically supports up to 2 km over multimode fiber; longer distances require single-mode SFPs.

Port Density: Choose a switch with enough SFP ports to accommodate current and future connections. Managed vs Unmanaged: Managed switches provide VLANs, QoS, and monitoring, which are useful for enterprise or industrial networks, while unmanaged switches are simpler for small deployments.

Summary

For a 100 Mbps fiber optic connection, the recommended solution is a switch with 100BASE-FX SFP ports. This can be a modular enterprise switch like the Cisco Catalyst 6500 or a commercial/industrial SFP-based switch from vendors such as Versitron. Using 100BASE-FX SFPs ensures reliable, interference-resistant fiber connectivity suitable for distances up to 2 km over multimode fiber.

100BASE FX SFP: Complete Guide to 100Mbps Fiber Transceivers

A 100BASE FX SFP enables 100Mbps Fast Ethernet transmission by converting electrical signals from a switch or media converter into optical signals for fiber transmission, and then converting them back to

How to Connect Multiple Ethernet Switches Using Fiber Optic Cables ...

To connect multiple Ethernet switches, the best way is to use a multi-strand fiber cable. The 4-strand pre-terminated fiber optic cable consists of four individual strands or fibers of glass or

Cisco 10GBASE SFP+ Modules Data Sheet

Cisco FET-10G module The Cisco FET-10G Fabric Extender Transceiver supports link lengths up to 100m on laser-optimized OM3 or OM4 multimode fiber. It is supported on fabric links

Cisco SFP and SFP+ Transceiver Module Installation Notes

These transceiver modules are hot-swappable input/output (I/O) devices that plug into 100BASE, 1000BASE and 10GBASE ports (for SFP+), which connect the module port with the fiber

Application Guide: Connecting Fiber-ready Network

© 2026 BAGYOU FIBRE NETWORKS - All rights reserved

Most modern fiber-enabled network switches require an SFP transceiver module featuring a duplex (two strand) multimode OM3 or duplex single mode OS2

Connecting Network Switches via Fiber

SFP transceiver modules are specific to the type of fiber being connected (either single mode or multimode). Choose an SFP module based on the fiber optic cabling that will be connected to the

Guide to Fiber Network Cards: 10G/25G/100G NIC

Fiber network cards are no longer niche, they''re central to modern servers, storage, and AI infrastructure. From simple 10G upgrades to full 100G

How do you connect a switch to fibre?

This guide will walk you through the process of connecting a switch to a fiber optic network, covering the necessary components, steps, and considerations to ensure a smooth setup.

Complete Guide to Choosing the Right 100M Optical Transceiver

Choose the right 100M optical transceiver by checking compatibility, fiber type, wavelength, distance, data rate, connector, and reliability.

Media Converter

10GBase media converter supports a 10GbE fiber connection with CAT.6a, CAT7 RJ45 Copper. This converter designed with 2 SFP+ slots, SFP1 port for a SFP+

GFiber Internet Speed Test

Test your internet speed with the GFiber speed test tool from Highspeedinternet . See how fast your connection is and what type of

Fiber Optic Internet Speed Test | Verizon Business
