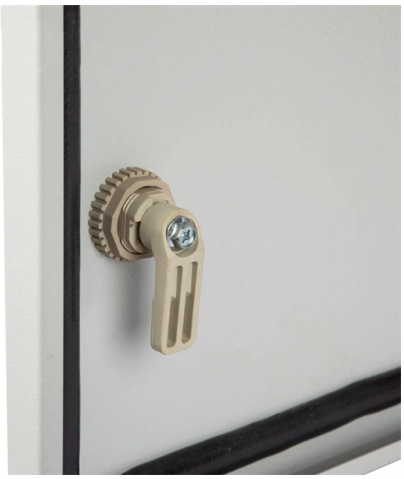
Sri Lanka Optical Core Router OSFP



Overview

The OSFP-800G-2xFR4L is designed to operate in switch and router applications supporting OSFP MSA compliant traffic for up to 6km links. 850 Gigabit signal is carried over 2xCWDM4 lanes. 25Gb/s. Cisco QSFP-DD and OSFP 800G ZR/ZR+ digital coherent optics modules enable 800G traffic over amplified Dense Wavelength-Division Multiplexing (DWDM) links up to 120 km for 800ZR and over 1000 km for 800G ZR+. With initiatives like the National Digital Economy Strategy and growing demand for 5G, IoT, and e-commerce, the need for high-speed. This specification defines the electrical connectors, electrical signals and power supplies, and mechanical and thermal requirements of the OSFP Module, connector, and cage systems. The OSFP Management interface is described in a separate document: “Common Management Interface Specification. Octal Small Form-factor Pluggable (OSFP) solution that fits into high-density switch and router client ports for optical interconnect links Powered by Greylock and Delphi DSP ASICs, and silicon photonic integrated circuits (PICs) for an optimized co-packaged design with 3D Siliconization Supports.
