Malta optical cable nitrogen generator manufacturer

Overview

Simtar Makina is a company specialized on manufacturing nitrogen generators based on PSA system located in Turkey.

Key Takeaways

ProEnergy Solutions Ltd. in Malta provides tailored nitrogen generator systems suitable for industrial applications, including optical cable production. Local Supplier in MaltaProEnergy Solutions Ltd. is a Malta-based company specializing in nitrogen generators. They offer customized systems designed to meet specific requirements for purity, flow rate, and pressure, which are critical for optical cable manufacturing and other high-precision industrial applications.

Their services include consultancy, system design, installation, and after-sales support, ensuring reliable and cost-effective nitrogen supply on-site.

International Manufacturers

Several international companies provide nitrogen generators that can be shipped to Malta or installed locally: OXYMAT: Offers PSA and membrane nitrogen generators with low energy consumption, suitable for industrial and laboratory applications. They provide solutions for on-site production, cylinder filling, and backup supply. Holtec Gas Systems: Supplies turnkey nitrogen generators with capacities ranging from 20 to 250,000 SCFH and purities from 95% to 99.

999%. Holtec systems are customizable for specific industrial needs, including optical cable production, and include comprehensive aftermarket support. Blutek: Provides both membrane and PSA nitrogen generators.

Membrane systems are ideal for lower purity requirements, while PSA systems deliver high-purity nitrogen up to 99. 9%. Blutek emphasizes modular design, scalability, and integration with local ambient conditions.

Oxywise: Offers PSA nitrogen generators with capacities from 1 to 5,193 m^3/hour and purities from 95% to 99. 9995%. Their systems are designed for continuous, reliable nitrogen supply, suitable for electronics, pharmaceuticals, and laser or optical cable manufacturing.

Key Considerations for Optical Cable Applications

Purity Requirements: Optical cable production often requires high-purity nitrogen to prevent oxidation and ensure quality.

PS

A generators are typically preferred for purities above 99%. Flow Rate and Pressure: Systems must be sized to meet continuous production demands, with adjustable flow and pressure to match process specifications.

On-

Site Production: Generating nitrogen on-site reduces dependency on cylinder deliveries, lowers costs, and ensures uninterrupted supply. Customization and Support: Selecting a supplier that offers tailored solutions, installation, and maintenance support is crucial for long-term reliability. For companies in Malta, ProEnergy Solutions Ltd. is the primary local provider, while international suppliers like OXYMAT, Holtec, Blutek, and Oxywise can provide advanced systems with high purity and capacity suitable for optical cable manufacturing.
