Price of Temporary Indoor Power Distribution Boxes for Construction Sites

Overview

Amazon.com: Power Distribution BoxBrowse power distribution boxes with circuit breaker protection and multiple outlet configurations. Shop durable solution.

Key Takeaways

Temporary indoor power distribution boxes for construction sites typically range from $200 to $1,500 for purchase, or €20–€100 per day for rental, depending on amperage, outlets, and features.

Purchase Options and Pricing

Temporary power distribution boxes, also called site boxes or spider boxes, are available for purchase from suppliers like Amazon, One-Elec, and Hubbell Wiring Device-Kellems. Prices vary based on amperage rating, number of outlets, and enclosure durability: Basic 50A or 60A spider boxes with multiple 120/240V outlets typically cost $200–$500 for a single unit (Amazon, Hubbell). Higher-capacity units (100A–250A) with multiple circuits, MCCBs, and RCCBs for larger construction sites can range from $800–$1,500 or more, depending on customization and safety features (Blakley Electrics).

Waterproof and dustproof enclosures designed for harsh environments may add to the cost but improve safety and longevity (One-Elec).

Rental Options and Pricing

For short-term projects, renting a temporary power distribution box is often more cost-effective: Daily rental rates for standard 63A units start around €20–€50 per day, with weekly rates typically €80–€150, excluding VAT and additional costs like transport, maintenance, or damage waiver (Boels). Weekend or extended use may incur surcharges, and delivery or setup fees are usually extra.

Factors Affecting Price

Amperage rating – Higher amperage units cost more due to larger switchgear and safety components. Number of outlets – More outlets or specialized sockets (e.g., 3-phase) increase cost. Safety features – Circuit breakers, differential switches, emergency stops, and rugged enclosures add to price.

Rental vs. purchase – Rentals are cost-effective for short-term projects, while purchase is better for long-term or repeated use. Customization – Custom assemblies with segregated circuits or adjustable MCCBs are more expensive.

Summary

Purchase: $200–$1,500 depending on capacity and features. Rental: €20–€100 per day, €80–€150 per week, excluding VAT and additional fees. Key considerations: amperage, number of outlets, safety features, and project duration.

Choosing the right temporary power distribution box ensures safe, reliable, and efficient power supply for construction sites while preventing overloads and electrical hazards.
