A US manufacturer of fiber optic splice boxes

Overview

Fiber Splice Boxes | Amphenol Network SolutionsFiber splice boxes from Amphenol Network Solutions are designed for splice-only applications. They are suite.

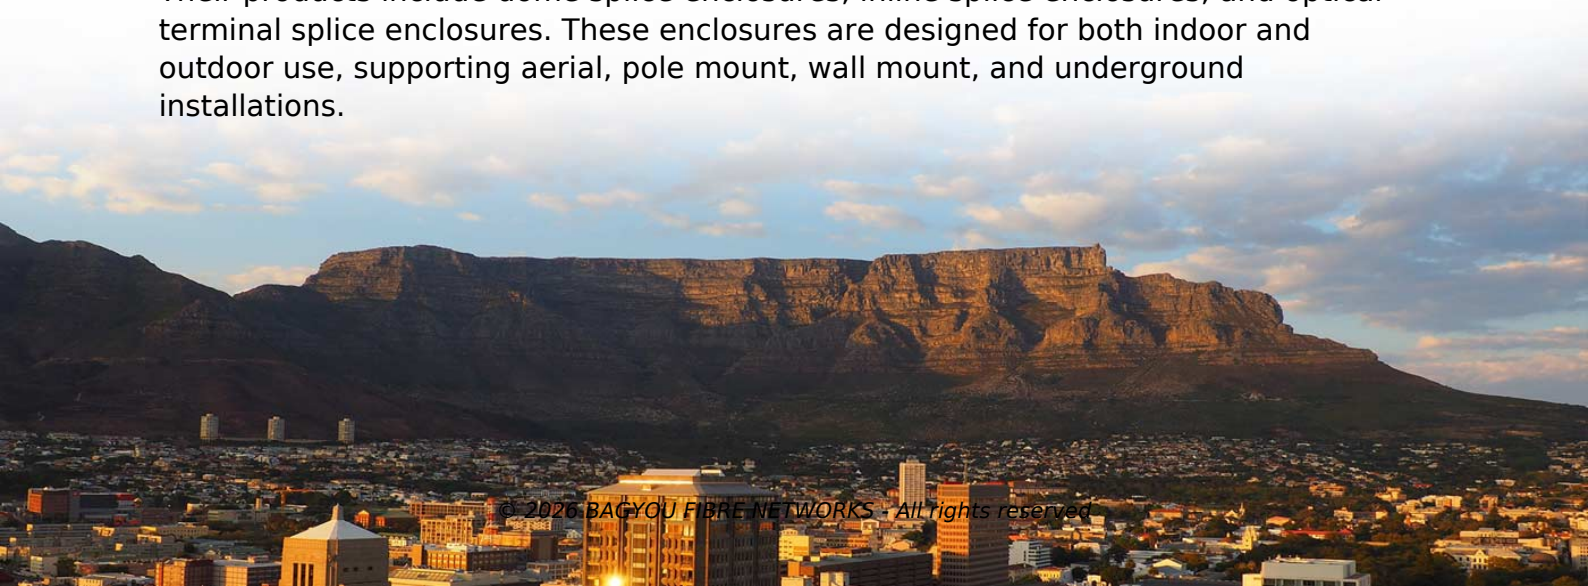

Key Takeaways

Leading US manufacturers of fiber optic splice boxes include Amphenol Network Solutions, Primus Cable, Fibertronics, and Splice Technologies, Inc., offering a range of indoor and outdoor enclosures for various network applications.

Key Manufacturers and Products

Amphenol Network Solutions produces the FSB series of indoor wall-mount enclosures designed for centralized splice-only applications. These aluminum boxes support high-density splice storage and can be configured for ribbon or single fiber splicing. They are suitable for DAS, MTU, and MDU networks, with modular cable port accessories and multiple sealing options for cable management.

Primus Cable offers a variety of fiber optic closures and pedestals made in the USA. Their products include dome splice enclosures, inline splice enclosures, and optical terminal splice enclosures. These enclosures are designed for both indoor and outdoor use, supporting aerial, pole mount, wall mount, and underground installations.

They accommodate multiple splice trays and provide high-capacity splicing for campus LANs, data centers, and entrance facilities. Fibertronics, Inc. provides horizontal and vertical splice closures engineered for secure fiber optic splicing. Their enclosures protect against environmental factors, maintain signal integrity, and support organized cable management.

Fibertronics products are suitable for FTTH networks, data centers, and large-scale telecom infrastructure, with a wide range of splice trays and accessories available. Splice Technologies, Inc. specializes in fusion splice protection sleeves and passive components for fiber optic communications. Their US-manufactured products include protection sleeves for single, ribbon, and specialty fibers, as well as biconic connectors, cable breakout kits, and ribbon forming fixtures.

They emphasize high-quality manufacturing and reliability for fiber optic systems.

Applications and Considerations

These U

S manufacturers provide solutions for residential, commercial, and industrial fiber networks, including high-density splicing, aerial and underground installations, and multi-dwelling unit deployments. When selecting a splice box, consider factors such as capacity, environmental protection, mounting options, and compliance with industry standards. These manufacturers ensure that products are domestically produced, which can be important for procurement policies, quality assurance, and support for US-based infrastructure projects.
