Are horizontal cable trays the same as cable ducts

Overview

When it comes to managing and protecting cables in various environments, both cable trays and cable ducts serve as essential components. However, they are not interchangeable. Each system has unique characteristics that make it more suitable for specific applications. Understanding the differences. Let's talk about the key differences. We'll look at materials, what they're used for, and how they stack up in the real world. This will help you make a smart decision for your next job. NEC Article 392 recognizes these types: Ladder tray - Two side rails. Wires are concealed in ducts to make things appear clean, and ties are easy-to-use tools that are used to bundle small sets together. Cable trays are typically used to support.
