Calibration of Optical Communication Test Instruments in Nigeria

Overview

Calibration – NQACALAvail of on-site calibration across Nigeria and the Africa Continent for enhanced efficiency and expedited service – with our deliverab.

Key Takeaways

Optical communication test instruments in Nigeria can be calibrated through accredited laboratories offering ISO/IEC 17025: 2017-compliant services, both in-lab and on-site, ensuring traceability and measurement accuracy.

Accredited Calibration Providers

Several Nigerian companies provide optical instrument calibration: Tra-Cal specializes in optical calibration for devices such as laser sources, LED sources, optical power sensors, optical attenuators, and optical spectrum analyzers. They offer both in-lab and on-site services, ensuring traceability to national and international standards and compliance with ISO/IEC 17025: 2017, which guarantees high accuracy and reliability for optical measurements.

NQ

A & Conformity Assessment Nig. Ltd. (NQACAL), located in Ikeja, Lagos, provides a wide range of calibration services, including electromagnetic and optical instruments. They offer on-site calibration across Nigeria, fast turnaround, and traceability to international benchmarks, ensuring reliable and repeatable results.

Keton Technology Limited offers on-site and mobile laboratory calibration services for various instruments, including optical devices, supporting manufacturers and production lines to maintain measurement accuracy and reduce downtime.

National Metrology Oversight

The Standards Organisation of Nigeria (SON), through its National Metrology Institute (NMI), is the custodian of Nigeria's primary measurement standards. Calibration laboratories and industries derive traceability from the NMI, ensuring that optical instruments calibrated in Nigeria meet SI unit standards and international comparability.

The NM

I also participates in international inter-comparisons and provides training and awareness programs to maintain high metrological standards.

Key Considerations for Optical Instrument Calibration

Traceability: Ensure the calibration provider maintains traceability to national or international standards. Accreditation: ISO/IEC 17025: 2017 accreditation is critical for reliable and recognized calibration results. On-site vs.

In-lab: On-site calibration is convenient for large or sensitive instruments, while in-lab calibration may offer more controlled conditions. Instrument Types: Confirm the provider can calibrate your specific optical communication instruments, such as optical power meters, spectrum analyzers, and attenuators. Turnaround Time: Some providers, like NQACAL, offer deliverables within a week, which is important for operational continuity.

Conclusion

For optical communication test instruments in Nigeria, companies like Tra-Cal, NQACAL, and Keton Technology provide accredited, reliable calibration services. Coordination with the National Metrology Institute (SON) ensures traceability and compliance with international standards, supporting accurate, repeatable, and legally recognized measurements for industrial, research, and telecommunications applications.

Article Content

Calibration – NQACAL

Avail of on-site calibration across Nigeria and the Africa Continent for enhanced efficiency and expedited service – with our deliverables received within a week after calibration work is completed.

Noscow Instrument

We provide precise calibration services to ensure your instruments perform accurately and comply with industry standards. Trust us to maintain the integrity

Expert Calibration Services in Nigeria – OHRAJ INSTRUMENTATION ...

Partner with OHRAJ Instrumentation Solutions Ltd for reliable, accurate, and affordable calibration services. Stay compliant with SON, NAFDAC, GMP, ISO, and other regulatory standards.

KETON TECHNOLOGY | Instrument Validation and Calibration

Our calibration services will help you set up the support you need to make sure your measurement tools and instruments are properly calibrated and accessible at all times to reduce risk of any costly

Nace Engineering & Inspection Limited

Nace Engineering & Inspections Limited is a supplier of quality calibration services in the West African region. We are routinely performing tank, meter, prover loop and instrument calibrations/certifications

Measurement & Calibration Services

Our experienced technicians calibrate and repair all types of test equipment from DMM''s, Power Sources, Pressure, Weights, Air Data Test Sets, Oscilloscopes, Spectrum Analyzers and Signal

Instrumentation & Calibration Services Limited – Electrical,

Instrumentation & Calibration Services Limited — ICSL was founded in 2014 in Port Harcourt, Nigeria, as a provider of instrumentation and calibration services to the Oil & Gas, Energy, Aviation, and

Test, Measurement, Calibration Services, Energy Management

PowerPro provides Calibration Services, Sales, Equipment Rental and Support of Test and Measurement Equipment from Leading manufacturers. We offer expert support with prompt deliveries.

© 2026 BAGYOU FIBRE NETWORKS - All rights reserved

Adekemi Technical Service Limited – in affiliate of Adekemi ...

Through the expertise of our highly trained and skillful service and calibration engineers, we aim to solve process control and calibration problems efficiently and effectively.

Electrical Calibration Services Lab in Nigeria | Lagos, Port Harcourt

Calibration Services Test & Calibration At PowerPro, we offer Calibration services. We know what it means to have your test Instruments serviced and calibrated. That''s why we offer ISO/IEC 17025

Fluke Corporation: Fluke Electronics, Calibration and Networks

Fluke Corporation is the world leader in the manufacture, distribution and service of industrial engineering electronic test tools, thermal imaging, calibration and networking solutions.

Calibration and Dimensional Testing Inspection | SGS Nigeria

Calibration and Dimensional Testing Inspection Calibration and dimensional testing (inspection) from SGS – ensuring that precision instruments are regularly and accurately calibrated. Precision

Instrument Calibration Service in Lagos Nigeria

Why Powerpro Calibration Services Company? we offer ISO/IEC 17025 traceable instrument calibration service. We make sure that the standardized instruments are giving correct readings, and when

Calibration Services for Measuring Test Equipment

Calibration services for measuring test equipment to ensure that your instruments always perform as expected. Calibration of measuring test equipment or electrical test equipment such as

Instrument Calibration and Repair | SGS Nigeria

In addition to our calibration and repair services, we can also provide replacement monitors during the repair period and/or offer competitive rates for monitor rental. Contact your local SGS office to learn

Calibration – Standards Organisation of Nigeria

What is calibration? The International Bureau of Weights and Measures (BIPM) defines calibration as: “Operation that, under specified conditions, in a first step, establishes a relation between the quantity

Industrial Instrument Test And Calibration Services Company

© 2026 BAGYOU FIBRE NETWORKS - All rights reserved

It might be boring to read when we list all kinds of gas detectors or all kinds of calibration services we render here at Industries Safety Nigeria. As we have listed or mentioned earlier, we also have other

Calibration Service in Nigeria – Powerpro Company Limited

Our team is highly qualified and can provide calibration services for a wide range of instruments, including electrical, mechanical and dimensional instruments. In addition to providing calibration
