Cambodia CIF Price for Long-Distance Optical Cable G 652D

Overview

Looking for reliable fiber optic solutions in Cambodia? Discover top suppliers, competitive pricing, and customizable options. Click to find trusted manufacturers with verified credentials and fast delivery.

Key Takeaways

The CIF price for G. 652D optical fiber in Cambodia is currently influenced by global supply constraints and high demand, with indicative prices ranging from $0. 50 to $1.

20 per meter depending on volume, specifications, and supplier. Market ContextG. 652D optical fiber, a low-water peak single-mode fiber, is widely used for long-distance and high-speed networks, supporting CWDM and DWDM systems with low attenuation and excellent macrobending performance.

Global demand has surged due to 5G rollout, FTTH expansion, AI data centers, and smart city projects, driving prices upward in 2025–2026. The global market for G. 652D fiber was valued at $8.

4 billion in 2025 and is projected to grow at a CAGR of 7. 6% through 2034.

Supply and Pricing Factors

Raw materials: Silica preform costs and production efficiency affect pricing. Geopolitical events: Supply disruptions, such as the Russia-Ukraine conflict, have increased reliance on Chinese suppliers, further elevating prices. Lead times: Quotation validity is short (1–3 days), and allocations are tight due to high demand.

Volume discounts: Bulk orders for long-distance projects can reduce per-meter costs.

Cambodia Import Trends

In 2024, Cambodia imported $24. 8 million of optical fibers and cables, primarily from China ($11. 8M), Vietnam ($8.

43M), and the United States ($4M). This indicates that most G. 652D fiber in Cambodia is sourced from China, which is currently the largest global supplier.

CI

F pricing will therefore reflect Chinese export prices plus shipping and insurance to Cambodian ports.

Estimated CIF Price Range

Based on global market trends and Cambodian import patterns: Standard G. 652D fiber: $0. 50–$0.

80 per meterHigh-performance or low-loss variants for long-distance applications: $0. 90–$1. 20 per meter These estimates include shipping and insurance to Cambodian ports but may vary depending on order size, supplier, and current market volatility.

Recommendations for Procurement

Engage multiple suppliers in China and Vietnam to secure competitive CIF quotes. Consider phased orders to mitigate price volatility and allocation risks. Monitor global market updates regularly, as prices can change rapidly due to demand surges or geopolitical events.

Verify fiber specifications (attenuation, macrobending loss, wavelength range) to ensure compatibility with long-distance network requirements. By factoring in these considerations, Cambodian buyers can optimize procurement costs while ensuring reliable supply for long-distance optical cable projects.
