Channel-type stainless steel cable trays

Overview

Discover durable channel stainless steel cable trays for corrosion-resistant cable management. Industrial automation and infrastructure development in emerging economies are primary growth catalysts, particularly in Asia-Pacific where China dominates regional. Stainless steel cable trays are made of 304, 316 grade stainless steel, which are designed into channel style, ladder style, perforated style. Stainless steel cable trays have sturdy structure, resist rust and they are specified for cable containment and cable support in oil, gas, petroleum. T&B channel tray systems are fabricated from a corrosion-resistant metal (low-carbon steel, stainless steel or an aluminum alloy) or from a metal with a corrosion-resistant finish (zinc or epoxy). (For our aluminum angle, we also offer a pinned angle splice that saves labor.
