Construction Site Electrical Distribution Box Brands

Overview

Finding reliable electrical distribution boxes is essential for construction sites, workshops, outdoor events, and temporary power setups.

Key Takeaways

Popular brands for construction site electrical distribution boxes include BOSECKER, WALTHER WERKE, DIGITAL ELECTRIC, HLC, ENERGYBOX, and Elektra. Leading Brands and Their FeaturesBOSECKER / WALTHER WERKE: These distributors are designed according to IEC 61439 and IEC 60364 standards, featuring robust sheet steel housings for outdoor use. They offer connection cabinets, main and group distributors, and terminal distributor cabinets, often pre-wired and tested for safety.

They include CEE and earthed sockets with upstream safety devices and are suitable for lighting, cranes, and construction machinery applications.

DIGITAL ELECTRIC and HL

C: These brands provide versatile construction site enclosures, including thermoplastic and fiberglass options. They are designed for medium appliances and three-phase current consumers, with IP65–IP67 protection ratings and impact resistance (IK08–IK10), suitable for temporary or mobile installations.

ENERGYBO

X (Palazzoli): ENERGYBOX assemblies are pre-wired, wall-mounted or support-mounted boards made from fire-resistant technopolymer. They are reusable across multiple sites and ideal for civil building sites, outdoor events, and temporary electrical distribution. Elektra: Elektra construction site distributors feature high-quality plastic housings with cross-divided inlet/outlet openings and folding strain relief clamps for fast, safe connections.

They allow easy access to fuses and meters without removing covers completely, reducing installation time by up to 50%. Wieland Electric: Offers mobile and pluggable distribution boxes for exhibitions, events, and temporary installations. Their systems use gesis®/RST® connectors for safe, fast, and error-free commissioning, with options for indoor and outdoor IP-rated applications.

Considerations When Choosing a BrandStandards Compliance: Ensure the distributor meets IEC 61439 and local electrical codes.

I

P Rating: Choose IP65–IP67 for outdoor or wet environments. Mobility and Flexibility: Prefabricated or pluggable systems allow quick setup and relocation. Safety Features: Look for RCD protection, upstream safety devices, and robust housings.

Application Type: Select distributors suitable for lighting, cranes, pumps, or general power supply depending on site needs. These brands provide a range of solutions for temporary and permanent construction site power distribution, balancing safety, durability, and ease of installation.
