Distribution box complete set of 13 circuits

Overview

13-circuit waterproof distribution box, single-row design with bottom opening for easy wiring and maintenance. IP65 sealing and PC/ABS housing for reliable indoor/outdoor performance and impact resistance. The hub distributes electrical power from a single input source to various circuits throughout a building. Designed to distribute electrical circuits safely and efficiently, these panels accommodate up to 13 individual circuits, making them ideal for. A distribution box is a low-voltage electrical enclosure that receives incoming power and distributes it safely to multiple outgoing circuits through protective and switching devices such as MCBs, RCDs, RCBOs, fuses, isolators, busbars, neutral bars, earth bars, and surge protective devices. From there, the power is distributed through the breakers to secondary.
