Does the mobile company have fiber optic cables

Overview

Instead of data transmission via cell towers, T-Mobile Fiber uses physical fiber-optic cords to deliver internet to your home. Currently, fiber is the fastest internet connection type available, significantly faster than cable internet or even satellite. Fiber internet achieves its very fast, gigabit-speed capacities from fiber-optic technology, which transmits light signals through tiny strands of glass. 9% reliability and Smart WiFi 6E for greater whole-home WiFi coverage and elimination of dead zones. With America's largest 5G network, you can always be online Bundle. Verizon Fios Home Internet is the premium 100% fiber-optic option. Compared to hybrid fiber-coaxial cable internet providers like Spectrum and Optimum, Fios provides nearly symmetrical upload and download speeds up to 2.
