Electrical cable tray through-wall bushing

Overview

They are designed to carry high-voltage conductors through the grounded metal partitions of switchgear cabinets, providing both electrical insulation and robust mechanical support for 12kV, 24kV, and 40. XBRELE's Epoxy Wall Bushings (also known as Through-Wall Insulators) provide reliable electrical isolation for busbars passing through grounded partitions. Featuring TG3 (KYN28) and Gas-Tight (GIS) series, molded via APG technology for zero partial discharge. We design these epoxy bushings specifically for medium voltage applications, ensuring they isolate conductors—such as quarter-inch thick. Check each product page for other buying options.) Choose from our selection of cable pass-throughs, including wraparound multi-cord grips, compact plastic submersible cord grips, and more.
