Fiber Optic Distribution Frame 24 Ports 48 Cores lc

Overview

The Haile 24 Port 48-core ODF Fiber Distribution Frame P3-48MT-LC is a high-performance fiber optic management system designed for advanced network environments. This 19-inch pull-out rack-type frame supports LC multi-mode connections and provides a robust solution for managing up to. An optical distribution frame (ODF) is a frame used to provide cable interconnections between communication facilities, which can integrate fibre splicing, fibre termination, fibre optic adapters & connectors and cable connections together in a single unit. These devices and systems use light to transport data and provide better dependability and bandwidth than conventional copper connections. Its. This type of ODF is design for large splice tray, excellent armor plate, and has good protection of pigtails.
