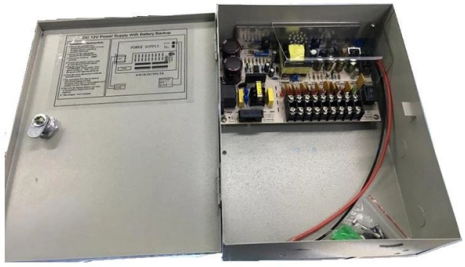
Four-Port Fiber Optic Information Panel



Overview

Find 4 Port Fiber Patch Panels related suppliers, manufacturers, products and specifications on GlobalSpec - a trusted source of 4 Port Fiber Patch Panels information.

Key Takeaways

A Four-Port Fiber Optic Information Panel is a compact device that supports up to four optical fibers for termination, storage, and secure mounting in fiber optic networks.

Overview

A four-port fiber optic information panel is designed to manage and organize fiber optic connections in a network. It typically accommodates 1 to 4 fibers, serving as a termination point or storage unit for fiber patch cords. These panels are widely used in FTTH (Fiber to the Home) deployments, residential buildings, commercial offices, and data centers, providing a secure and organized solution for fiber management (HJ-ESS).

Key Features

Compact and Lightweight Design: Many mini wall-mount panels measure approximately 100. 5mm (L) x 85mm (W) x 29mm (H) and weigh between 0. 1kg to 0.

16kg when fully loaded, making them suitable for wall mounting or placement in floor boxes (Fibertek). Connector Compatibility: Panels can support LC duplex adapters or SC simplex adapters, allowing flexibility depending on the network requirements (Fibertek). Splice Management: Includes a simple splice management kit with accessories such as cable ties, wall plugs, splice sleeves, and screws to facilitate fiber splicing and secure installation (Fibertek).

Secure Mounting: Designed for wall mounting or integration into enclosures, providing a space-saving solution for fiber distribution (Fibertek).

Applications

Residential and Commercial Buildings: Provides organized fiber termination for FTTH networks, ensuring reliable connectivity for multiple users (HJ-ESS). Data Centers and Telecom Installations: Can be used as a compact patch panel for small-scale fiber management, supporting both single-mode and multimode fibers (CommScope). Flexible Deployment: Suitable for urban, off-grid, or remote locations where compact and reliable fiber management is required (HJ-ESS).

Benefits

Efficient Fiber Management: Keeps fiber connections organized and reduces the risk of damage or signal loss. Easy Installation: Lightweight and compact design allows quick deployment in various environments. Versatility: Compatible with multiple connector types and supports both termination and storage functions.

In summary, a four-port fiber optic information panel is a versatile, compact, and reliable solution for managing small-scale fiber optic networks, providing secure termination, storage, and easy integration into residential, commercial, or data center environments.
