Guatemalan Export of 20kW Intelligent Energy Storage Unit CIF Price

Overview

Get verified guatemala Export Data, guatemala customs data and shipment data including exporters, buyers, trade patterns, HS codes and port information at Exim Trade Data.

Key Takeaways

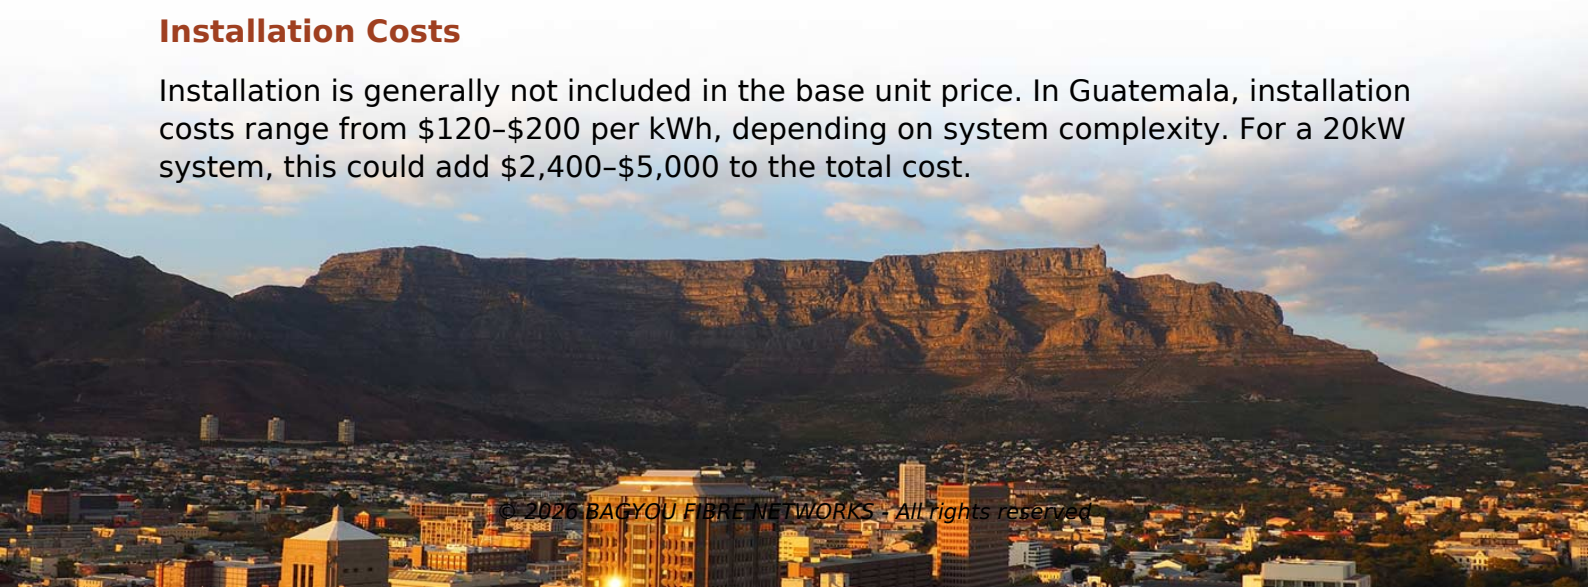

The estimated CIF price for a 20kW intelligent energy storage unit from Guatemala ranges between $12,000 and $15,000, including shipping and insurance, depending on supplier, season, and installation requirements.

Local Market Price

In Guatemala, battery storage units are priced based on capacity and market conditions. A 100kWh system typically costs enough to justify a 3–4 year payback through energy savings, and prices fluctuate seasonally, dropping 4–6% during the rainy season (May–October) and rising in Q4. Extrapolating from this, a 20kW system (roughly 20–25kWh for daily storage) would likely cost $8,000–$10,000 for the unit itself, depending on technology and supplier.

Installation Costs

Installation is generally not included in the base unit price. In Guatemala, installation costs range from $120–$200 per kWh, depending on system complexity. For a 20kW system, this could add $2,400–$5,000 to the total cost.

Shipping and Insurance (CIF)CIF pricing includes the cost of the product, insurance, and freight to the destination port. For a 20kW unit shipped internationally from Guatemala: Freight: Small container shipments or palletized units may cost $500–$1,000, depending on destination and shipping method. Insurance: Typically 0.

5–1% of the cargo value, adding $50–$150. Combining unit cost, installation, shipping, and insurance, the CIF price is approximately $12,000–$15,000.

Tariffs and Customs

Guatemala imposes relatively low average tariffs (3. 58% simple average), but specific energy storage units may fall under electrical machinery HS codes, which could attract additional duties of 5–10%, depending on the importing country. These are not included in the CIF estimate but should be considered for landed cost calculations.

Lead Time

Most suppliers in Guatemala require 8–12 weeks for delivery, though local stock can reduce this to 2–3 weeks. Planning for shipping and customs clearance is essential to avoid delays.

Summary

Unit Price: $8,000–$10,000Installation: $2,400–$5,000Freight & Insurance: $550–$1,150Estimated CIF Price: $12,000–$15,000 This estimate provides a practical range for budgeting purposes, but final CIF pricing will depend on the supplier, shipping terms, and destination port.
