Hot-dip galvanized fireproof cable tray supplier price quote

Overview

Fireproof cable tray available for wholesale, starting at $0.32 to $12. Minimum order quantity is 10 units. Hot dip galvanized, custom perforated, and anodized options.

Key Takeaways

Hot-dip galvanized fireproof cable trays currently range from approximately $0. 32 to $12 per unit, or $2 to $25 per meter depending on material, type, and size.

Price Overview

The cost of hot-dip galvanized (HDG) fireproof cable trays varies widely based on material, tray type, size, surface finish, and order quantity. Standard pricing for bulk orders starts at $0. 32 per unit and can go up to $12 per unit for specialized or custom trays, with a minimum order quantity of 10 units for wholesale purchases (Alibaba).

On a per-meter basis, prices typically range from $2 to $25, influenced by factors such as ladder vs. perforated trays, coating type, and load capacity (Apex Tray).

Factors Affecting Price

Material: Galvanized steel is the most common and cost-effective, while stainless steel and aluminum are more expensive due to corrosion resistance and lightweight properties. Coating: Hot-dip galvanizing (HDG) provides superior durability outdoors but costs more upfront compared to pre-galvanized or powder-coated options. Tray Type: Ladder trays are more expensive due to higher load capacity, while wire mesh or perforated trays are cheaper and suitable for lighter cabling.

Customization: OEM or custom designs, including perforation patterns, lengths, and widths, can increase costs. Market Trends: Prices are influenced by raw steel and zinc market fluctuations, supply chain conditions, and regional manufacturing hubs, with China, Vietnam, and India being major suppliers.

Supplier Options

Alibaba: Offers a wide range of HDG fireproof cable trays with bulk pricing starting at $0. 32 per unit.

Made-in-

China: Factory direct sales of wire mesh HDG fireproof trays with customization options.

EA

E Electric: Provides heavy-duty HDG cable trays and ladders in standard 3-meter or 6-meter lengths, suitable for industrial and commercial applications.

Practical Tips

For large-scale projects, ordering in bulk can significantly reduce per-unit costs. Consider lifecycle cost, including installation, maintenance, and expected durability, rather than just upfront price. Ensure compliance with local fire safety codes (e.g., NFPA 70, IEC 61537) and environmental conditions for optimal performance.

In summary, hot-dip galvanized fireproof cable trays are priced between $0. 32–$12 per unit or $2–$25 per meter, with costs influenced by material, coating, tray type, customization, and market conditions. Buyers should compare suppliers and consider long-term durability when selecting trays.
