Installation and pricing of sealed mesh cable trays

Overview

Cable Tray Cost Comparison Compare cable tray costs by type, material, and installation. Find the most cost-effective option for your project in this detai.

Key Takeaways

Installing wire mesh cable trays typically costs between $10 and $30 per meter, including materials and labor, depending on project complexity and location.

Material Costs

Wire mesh (basket) trays are generally lighter and more affordable than ladder or solid-bottom trays. Steel wire mesh trays are the most common, offering a balance of cost and durability, while aluminum trays are more expensive due to corrosion resistance and lightweight properties. Typical material costs for steel wire mesh trays range from $5 to $25 per meter, with aluminum trays costing $6 to $30 per meter depending on size and finish.

Installation Costs

Labor is a significant portion of the total cost. Wire mesh trays are easier and faster to install than traditional ladder or solid trays because they are lightweight, require fewer fittings, and allow flexible routing. Installation costs vary based on accessibility, height, and complexity of the cable route.

On average, total installed costs (material plus labor and accessories) for wire mesh trays are $10 to $30 per meter, though large-scale projects or difficult installations may increase this.

Accessories and Fittings

Additional costs include supports, brackets, connector plates, elbows, tees, reducers, and covers. While individual fittings may seem inexpensive, they can add up quickly, especially in complex layouts. Wire mesh trays require fewer fittings than ladder trays, which helps reduce overall installation time and cost.

Cost-

Saving Considerations

Project scale: Bulk orders can reduce per-meter costs by 20–40%. Material choice: Steel is cheaper than aluminum or stainless steel. Installation efficiency: Wire mesh trays reduce labor hours due to easier handling and flexibility.

Maintenance: Easier access for inspection and cable tracing can lower long-term maintenance costs. In summary, for a typical commercial or industrial installation, expect to budget around $10–$30 per meter for wire mesh cable trays, with the final cost influenced by material, installation complexity, and required accessories.
