Installation price of road lighting distribution boxes

Overview

It includes items for: 1) Supply and installation of street lighting poles, boxes, cables and distribution boards.

Key Takeaways

The price of road lighting distribution boxes varies widely, typically ranging from $50 to several hundred dollars per unit depending on specifications, materials, and order volume.

Factors Affecting Price

Material: Boxes can be made from metal (steel, aluminum), fiberglass, or durable plastics. Outdoor installations usually require metal or weather-resistant materials, which are more expensive than indoor-rated plastic models. Size and Capacity: Distribution boxes come in various sizes and modular designs, supporting different voltages (220V–380V) and currents (up to 100A).

Larger or multi-circuit boxes cost more. Protection and Standards: IP-rated enclosures (IP54–IP66) and compliance with standards like NEMA 3R increase durability and price. Customization: Custom designs, mounting options (pole or wall), and additional features like circuit breakers, monitoring, or IoT integration can significantly affect cost.

Order Volume: Wholesale purchases reduce per-unit cost, while single units or small orders are more expensive.

Typical Price Ranges

Basic plastic or ABS boxes for small-scale street lighting: $50–$150 per unit. Metal or fiberglass outdoor boxes with multiple circuits and IP protection: $150–$400 per unit. Advanced or smart distribution boxes with monitoring, modular design, or IoT capabilities: $400+ per unit, depending on features and manufacturer.

Market Trends

The global lighting distribution box market is growing due to urbanization and infrastructure development, with increasing demand for energy-efficient and smart lighting solutions. This trend is driving the adoption of higher-quality, durable, and technologically advanced distribution boxes. For accurate pricing, it is recommended to request quotes from manufacturers or distributors like Alibaba, KDM Fabrication, or Amazon, specifying material, size, IP rating, and quantity.
