Irish Household Electrical Distribution Box Standards

Overview

IS:10101 details the latest requirements for electrical installations in Ireland and comes into effect on the 1st of October 2020. We have created this bitesize guide, which outlines the principle changes to these wiring regulations, how they will affect you and what you can do to. The National Rules for Electrical Installations are essential for electricians, inspectors and regulators as they specify the safety requirements for electrical installations in all types of premises in Ireland. This device is specifically to detect and disconnect dangerous electrical arcs in both the fixed wiring and the connected equipment which could o insulation) in nature. This replaces the 4th Edition, ET 101:2008 (hereafter “the old standard”). The main changes impacted common areas such as RCD use, distribution boards and protection against transient overvoltages. Installers & contractors.
