Latest Price List for Cabling and Fiber Optic Cables

Overview

Main cost drivers include cable grade (indoor vs outdoor, armoured), distance, and labor for trenching, splicing, and termination.

Key Takeaways

Fiber optic cable prices in 2026 range from $0. 09 to $6 per foot depending on type, strand count, jacket, and installation requirements. Fiber Optic Cable PricingSingle-mode fiber (OS2): Typically costs $0.

09 to $1. 52 per foot for wholesale bulk purchases, with retail prices ranging from $1 to $6 per foot depending on fiber count and quality. Single-mode is ideal for long-distance transmission and backbone networks.

Multimode fiber (OM3/OM4): Costs are higher due to wider cores and manufacturing complexity, ranging from $1. 50 to $6 per foot. Multimode is commonly used in high-speed data centers and short-distance applications.

Armored cables: For protection against physical damage, armored cables cost $0. 50 to $6. 50 per foot, depending on construction and materials.

These are suitable for outdoor, underground, or high-risk environments. Pre-terminated or factory-terminated cables: These assemblies are more expensive upfront (20–30% higher) but reduce on-site labor costs significantly, potentially lowering total project costs by up to 70%. High strand-count cables: A 12-strand cable may cost around $0.

50 per foot, while a 24-strand cable can reach $1 per foot. Large backbone cables, such as 288-strand, can cost $6 per foot or more.

Copper and Network Cabling

Copper cabling (Cat6, Cat6a): Prices vary based on type, length, and installation. Typical per-meter costs for raw cable range from $0. 25 to $1.

50, with installation adding $2 to $6 per foot depending on complexity. Bulk purchases and pre-terminated assemblies can influence final costs.

Factors Affecting Pricing

Fiber type and count: More strands and multimode fibers increase cost. Jacket and rating: LSZH (Low Smoke Zero Halogen) or plenum-rated jackets are more expensive but required for safety and compliance. Installation method: Underground or aerial installations incur higher costs than indoor runs.

Material quality: Premium glass (e.g., Corning) costs more but ensures lower attenuation. Bulk orders: Manufacturers often provide volume discounts and custom cable options. Regional and labor factors: Local permits, labor rates, and shipping can affect total project costs.

SummarySingle-mode OS2: $0. 09–$1. 52/ft (bulk), $1–$6/ft (retail)Multimode OM3/OM4: $1.

50–$6/ftArmored cables: $0. 50–$6. 50/ftPre-terminated assemblies: 20–30% higher upfront, reduce labor costsCopper/network cables: $0.

25–$1. 50/ft for raw cable, $2–$6/ft installed These prices reflect the latest 2026 market trends and provide a baseline for budgeting fiber optic and network cabling projects.
