Lc is a small square tail fiber

Overview

Differences Between ST, SC, FC, and LC Fiber Learn the differences between ST, SC, FC, and LC fiber connectors. Explore connector types, PC/UPC/APC polish.

Key Takeaways

The LC (Lucent Connector) is a compact fiber optic connector with a small square body and a 1. 25 mm ferrule, ideal for high-density applications.

Physical Characteristics

The L

C connector features a miniaturized square body with a 1. 25 mm ceramic or zirconia ferrule, which is half the diameter of traditional SC, ST, or FC ferrules. Its small form factor allows for approximately twice the port density compared to SC connectors in the same rack space.

The connector uses a push-pull latch mechanism, similar to an RJ-45 clip, providing secure and easy insertion and removal. ApplicationsLC connectors are widely used in data centers, high-density patch panels, and SFP/SFP+/SFP28 and QSFP transceiver interfaces. They are particularly suited for duplex or simplex configurations and behind-the-wall (BTW) modules, making them a standard choice for modern telecom and enterprise networks.

Their compact size and low insertion loss make them ideal for environments where space and port density are critical.

Performance

Typical insertion loss for LC connectors ranges from 0. 10–0. 20 dB, and return loss is UPC ≥ −55 dB or APC ≥ −65 dB.

These specifications ensure high signal integrity and minimal light reflection, which is essential for high-speed optical transmission. Comparison to Other ConnectorsSC Connector: Larger square body, 2. 5 mm ferrule, push-pull design, lower port density.

S

T Connector: Round body, bayonet twist-lock, legacy systems.

F

C Connector: Round metal body, threaded coupling, high-vibration environments. In summary, the LC connector is indeed a small square tail fiber, designed for compact, high-density, and reliable optical connections in modern networking systems.

Differences Between ST, SC, FC, and LC Fiber

Learn the differences between ST, SC, FC, and LC fiber connectors. Explore connector types, PC/UPC/APC polish, single-mode vs multi-mode

Fiber Connector Types

LC vs SC Size - LC is smaller than SC, which is half the size of it. The diameter of the LC is 1.25mm while the SC is 2.5mm, thus LC is more

LC Fiber Connectors: What They Are and Why You Probably

An LC (Lucent Connector) is a small-form-factor fiber optic connector that uses a 1.25 mm ceramic ferrule and a secure push-pull latch mechanism. It supports both single-mode and multimode fibers

Fiber Connector Types: Lc Vs Sc Vs St Vs Fc — Which To Choose?

Its defining characteristic is a 1.25 mm ceramic ferrule—half the diameter of legacy SC/ST/FC ferrules—so LC enables significantly higher port density and is widely used where space and density

Fiber Optic Cable Assembly Guide | LC, SC & ST Connectors Explained

Learn how to select and test LC, SC, and ST connectors for reliable fiber optic cable assemblies. Includes polish types, OFC

Fiber Connector Types Demystified: LC, SC, FC, ST, MTP, and MPO

© 2026 BAGYOU FIBRE NETWORKS - All rights reserved

LC vs SC Size – LC is smaller than SC, with a diameter of 1.25mm compared to 2.5mm for SC, making LC more suitable for high-density applications. Its compact size allows for twice the

Fiber Optic Pigtail: The Complete Guide to Types,

Confused about fiber optic pigtails—which connector type, which polish, fusion or mechanical splice? Our guide covers LC vs SC, APC vs UPC,

SC, LC, ST, MTP/MPO Connectors: Key Differences and Deployment

The LC (Lucent Connector) is a compact Fiber optic connector that uses a smaller form factor than SC connectors. It employs a latch mechanism for connection and is designed for high-density applications.

Understanding LC Fiber: Exploring the World of Fiber

The LC fiber, or Lucent Connector fiber, is a small form-factor optic connector that was created to satisfy the requirements of telecommunications

Optical fiber connector

In many data center applications, small (e.g., LC) and multi-fiber (e.g., MTP/MPO) connectors have replaced larger, older styles (e.g., SC), allowing more fiber ports per unit of rack space.

LC square long tail dust cap for LC fiber optic jumper

Protect LC fiber optic jumper connectors with 100pcs transparent plastic dust caps, 1.25mm handle, braid chain, for reliable protection, 100pcs per pack, suitable for

A Breakdown of Fiber Optic Patch Connectors and

FC connectors make use of a 2.50mm ferrule. SC Connectors SC connectors are probably the most common fiber connector in use today, but they

Fiber Optic Pigtails: Choosing the Right LC, ST, or SC

Learn about the importance of fiber optic pigtails in network connections and discover the differences between LC, ST, and SC pigtails. Find

LC Fiber Pigtails – Smart Choice for FTTH & Patch Panels

That''s where the LC fiber pigtail comes in—compact, versatile, and engineered for precision. This article explores why LC fiber pigtails are one of the most popular choices in fiber

Fiber Connectors
