Moroccan fiberglass cable tray bracket dimensions

Overview

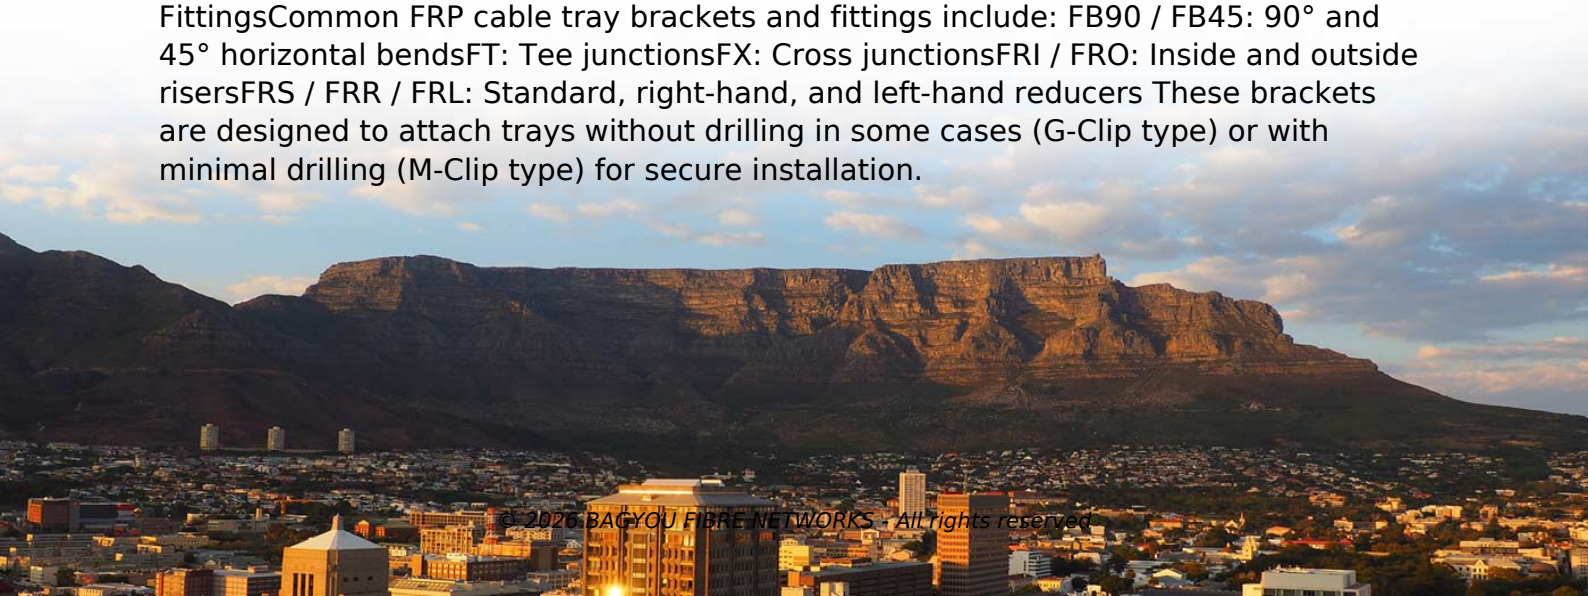

We, the renowned Electrical Cable Trays Manufacturer and Supplier in Morocco, use premium materials like galvanized steel, stainless steel, and fiberglass to manufacture our cable trays.

Key Takeaways

Fiberglass cable tray brackets typically accommodate side heights of 50–150 mm, widths of 50–300 mm, and tray thicknesses of 4–6 mm, following international FRP standards.

Standard Dimensions

Fiberglass reinforced plastic (FRP) cable trays, including ladder and channel types, use brackets designed to support the tray securely. Typical dimensions include: Side Height: 50 mm, 100 mm, 150 mmTray Width: 50 mm, 100 mm, 200 mm, 300 mmTray Thickness: 4 mm (standard for perforated and solid trays), with some series up to 6 mm for higher load applications Bracket Mounting: Usually designed for a four-bolt pattern compatible with tray depths of 3, 4, 6, and 8 inches Bracket Types and FittingsCommon FRP cable tray brackets and fittings include: FB90 / FB45: 90° and 45° horizontal bendsFT: Tee junctionsFX: Cross junctionsFRI / FRO: Inside and outside risersFRS / FRR / FRL: Standard, right-hand, and left-hand reducers These brackets are designed to attach trays without drilling in some cases (G-Clip type) or with minimal drilling (M-Clip type) for secure installation.

Material and Standards

Resin Type: Isophthalic Polyester (IP) is standard; vinylester or other resins may be used for higher chemical or heat resistance Standards Compliance: NEMA FG1, BS EN 61537, ASTM E-84 for fire retardancy, and UV protection for outdoor use Load and Deflection: Brackets are engineered to return to original position without permanent deflection under allowable loads Practical NotesBracket dimensions are generally compatible with international FRP cable tray systems, making them suitable for Moroccan installations. For specific project requirements, including unusual tray widths or heights, manufacturers can provide custom bracket dimensions.

Always verify compatibility with the selected FRP tray type (perforated, solid, ladder, or channel) and environmental conditions (corrosive, offshore, or high UV exposure). These specifications provide a reliable reference for selecting or designing fiberglass cable tray brackets in Morocco or similar regions.
