New Features of Ladder-Type Cable Trays

Overview

These trays consist of two parallel side rails connected by rungs at regular intervals, resembling a ladder. They provide excellent cable support, ventilation, and ease of maintenance, making them ideal for carrying power and communication cables. Our cable trays are produced in fit for purpose materials like stainless steel, galvanized, aluminium and fibreglass (FRP/GRP) composites to suit any project type both offshore and onshore. Lightweight aluminum construction and an innovative splice system cut hardware requirements in half, helping crews move faster with less effort. Enables longer tray runs without. Hubbell's NEXTFRAME® Ladder Tray is the effective and widely used cable runway that supports and delivers bundles of cable between cabinets, racks, and closets, along walls, and suspended from ceilings. The Ladder Tray features light, rugged, tubular steel construction.
