Non-curing heating distribution box manufacturer

Overview

Distribution enclosure, Distribution box Find your distribution enclosure easily amongst the 112 products from the leading brands (RITTAL, HARTING, MARECHA.

Key Takeaways

Several manufacturers provide non-curing heating distribution boxes suitable for industrial and building applications, including BriskHeat, BEULCO, Atex Delvalle, Wiggers, and Wieland. Key Manufacturers and OfferingsBriskHeat Corporation specializes in process heating solutions and offers flexible heating systems that maintain precise temperature control without curing requirements. Their products are designed for industrial applications, including composite processing and fluid heating, with advanced control options and portability for on-site adjustments (BriskHeat).

BEULC

O manufactures high-quality brass heating and cooling distributors. Their manifolds ensure efficient and even heat distribution, are pressure-tested, and come ready for connection. These distributors are suitable for underfloor heating systems and allow easy installation and hydraulic balancing without curing processes (BEULCO).

Atex Delvalle produces custom-made local control stations and distribution boxes, including stainless steel and GRP enclosures. Their products are designed for extreme conditions and hazardous areas, offering robust, explosion-protected solutions. These distribution boxes are configurable and suitable for industrial heating applications where curing is not required (Atex Delvalle).

Wiggers provides distribution boxes for underfloor heating systems with a focus on durability and ease of installation. Their boxes are moisture, mold, scratch, and impact-resistant, and can be customized to fit specific pipework layouts. They are delivered ready-to-install, eliminating the need for curing or additional preparation (Wiggers).

Wieland Electric offers electrical distribution boxes for decentralized energy and signal distribution in buildings and industrial plants. Their solutions are flexible, pluggable, and designed for high-demand environments. These boxes accommodate heating system components and allow easy installation and maintenance without curing processes (Wieland).

Considerations for Selection

Material: Stainless steel, brass, or GRP depending on environmental conditions and durability requirements. Customization: Ability to fit specific pipework or electrical layouts. Installation: Ready-to-install solutions reduce labor and eliminate curing steps.

Compliance: Ensure products meet relevant industrial standards and certifications for safety and performance. Application: Choose based on whether the system is for underfloor heating, process heating, or electrical distribution. These manufacturers provide a range of non-curing heating distribution boxes suitable for industrial, commercial, and building applications, with options for customization, robust materials, and compliance with safety standards.

Distribution enclosure, Distribution box

Find your distribution enclosure easily amongst the 112 products from the leading brands (RITTAL, HARTING, MARECHAL, ...) on DirectIndustry, the industry

Distribution cabinets

EAZY distribution cabinets guarantee an elegant and functional installation of the manifolds for heating and cooling systems. The cabinets can be installed at any place in the building without impairing the

Distribution boxes

Wiggers'' distribution boxes ensure a sleek finish for, among other things, the underfloor heating distributor. Simply place it over your system for excellent

Home | nVent HOFFMAN

© 2026 BAGYOU FIBRE NETWORKS - All rights reserved

With more than 16,000 standard products, nVent HOFFMAN has one of the most comprehensive product portfolios within the industry.

Home | Stahlin

For more than 70 years, Stahlin Enclosures has been a trusted leader in designing and manufacturing premium fiberglass, polycarbonate, and PVC non-metallic enclosures for a wide range of indoor and

BriskHeat Corporation

Industrial Heating Solutions That Deliver Innovative freeze protection and process heating systems engineered for reliability and performance.

Distribution Box Manufacturer, Best Power Distribution Box Supplier

We have a wide range of experience in designing and manufacturing power distribution boxes, and our goal is always to provide the best possible product for our customers.

EWJ – Custom Electrical Enclosures & Waterproof Distribution Boxes ...

Founded in 2021, EWJ focuses on delivering high-end solutions in distribution boxes and low-voltage electrical systems. Guided by the core values of integrity, innovation, and customer-first, we are

Early-Age Hydration Heat in Railway 60-Meter Precast Box Girders

Large precast concrete box girders are susceptible to cracking due to excessive temperature differentials induced by early-age hydration heat, compromising structural reliability and

Concrete Curing Boxes for Cylinder Molds

Concrete Curing Boxes are sturdy, lightweight boxes that maintain temperature conditions as specified in ASTM C31 and AASHTO T 23 standards. Curing

Thermax | Trusted Partner in Energy Transition

Thermax is a global leader in energy and environment solutions offering heating, cooling, power generation, water treatment, air pollution control, and green solutions.

THERMOCURE

Heavy, requires use of a forklift, pallet jack or crane. Does not use water to heat/cool. Does not maintain proper level of moisture. Steel will rust, Low Density Polyethylene (LDPE) will not. “Our units have

Thermocure Portable Curing Boxes

© 2026 BAGYOU FIBRE NETWORKS - All rights reserved

Thermocure Portable Curing Boxes offer storage of up to 22 concrete test specimens for proper initial curing and protection.

Perfa-Cure Curing Boxes

Lightweight Perfa-Cure Curing Box provides storage and protection for concrete test cylinders on the job site to meet required initial curing conditions. Users plug in the unit and set the thermostat to the

Power distribution box manufacturer: how does the power distribution ...

Next, the manufacturer of the distribution box will introduce the heat dissipation technology of the distribution box One is that we use heat pipes to dissipate heat. The heat pipe is a

Cure – Asiga

Cure any resin from any manufacturer with the onboard material profile library or with fully customisable settings. Easily create and save curing profiles through the user interface.

148006 | Duct board

Budgetheating specializes in custom cut duct board including tri-boxes! We stock Johns Manville Duct board we sell all insulation ''R'' values R4(1") / R6(1.5") / R8(2") thickness. Ductboard features an

Concrete Cure Box for Cylinders: The Benefits

Concrete Cure Boxes, with their robust and lightweight construction, exemplify a portable storage and transport solution for the construction industry.
