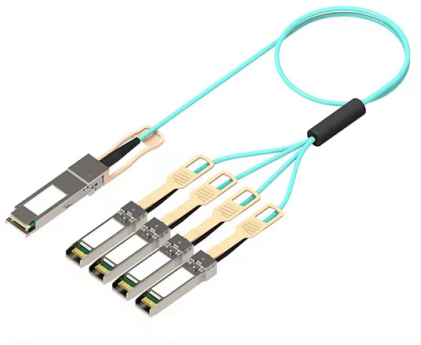
OLP603 Optical Power Meter



Overview

The SMETER Optical Power Meter OLP-603 is a versatile and easy-to-use optical power meter designed to provide accurate measurements in fiber optic systems. com is secured with strict SSL encryption and PCI DSS data protection protocols Claim a refund if your order doesn't ship, is missing, or arrives with product issuesThis unit is designed for optical power measurement in FTTH and other passive optical networks (BPON, EPON, GPON) that use 1490 nm to downstream data and 1550 nm to downstream video. OWL optical power meters contain special circuitry that protects the red laser diode from battery power surges. VIAVI offers fast, cost-effective, and easy-to-use power meters for installation and maintenance of single mode and multimode fiber optic networks and advanced, photonic-layer power meters for lab and production environments. Our tools are indispensable for professionals requiring accurate fiber testing.
