PDU Fiber Optic Cabinet Cold Aisle Intelligent Manufacturer

Overview

Aisle Containment Upgrade your data center with our conversion kit for efficient hot/cold aisle containment. It transforms single-row end-of-row frame into.

Key Takeaways

Leading manufacturers for PDUs, fiber optic cabinets, and cold aisle intelligent solutions include Olabs, Ningbo Tuxin, Gcabling, and Panduit, offering modular, certified, and customizable data center infrastructure products. Key Manufacturers and Offerings1. Olabs – FiberFlex™ PDUs and Cabinet Systems Olabs provides Power Distribution Units (PDUs) designed for server racks, wallmount racks, and LAN racks in data centers, offices, and universities.

Their PD

Us range from basic to customized configurations, supporting various socket types (UK BS1363, IEC320 C13) and horizontal or vertical rack-mount designs. Olabs emphasizes modular, flexible, and reliable solutions suitable for diverse IT environments, ensuring safe and efficient power distribution within cabinets and racks. 2.

Ningbo Tuxin Communication Equipment Co., Ltd Tuxin specializes in data center solutions, including server racks, network cabinets, outdoor cabinets, wall cabinets, open frame racks, and both basic and intelligent PDUs. They have extensive experience in cold/hot aisle containment, offering customized designs, OEM/ODM services, and one-stop solutions for global markets. Tuxin maintains strict quality control (CE, RoHS) and provides fast after-sales support, with sample availability in 7–14 days and standard order delivery in 30 days.

3. Gcabling – Intelligent and Basic PDUs Gcabling offers a comprehensive range of PDUs, from cost-effective basic units to advanced intelligent (switched/metered) models. Their products comply with CE, RoHS, and LVD standards, and they maintain in-stock availability for faster project deployment.

Gcabling emphasizes global standards, quality assurance, and distributor support, making them suitable for data centers requiring reliable and monitored power distribution. 4. Panduit – Cold Aisle Containment and Cabinets Panduit provides cold aisle containment solutions and cabinets designed to optimize airflow and cooling efficiency in data centers.

Their products include dual sliding doors, adjustable vertical walls, end-of-row frames, and integral roofs to maintain optimal temperature control while allowing easy equipment access. Panduit's solutions are ideal for improving energy efficiency and reliability in single-row or multi-row data center configurations.

Considerations for Selection

Certifications: CE, RoHS, LVD compliance ensures safety and regulatory adherence. Modularity: Flexible PDU and cabinet designs allow customization for rack size, outlet type, and cable management. Thermal Management: Cold aisle containment systems improve cooling efficiency and reduce energy consumption.

After-

Sales Support: Manufacturers like Tuxin provide rapid response and on-site engineering support for installation and troubleshooting. Global Reach: Many of these manufacturers support international markets, including North America, Europe, Asia, and Africa. These manufacturers collectively provide integrated solutions for power distribution, fiber management, and intelligent thermal containment, making them suitable for modern data center deployments.
