PXT distribution box and PZ box

Overview

Applications: Suitable for commercial buildings and residential buildings, used for final distribution of lighting and socket circuits.

Key Takeaways

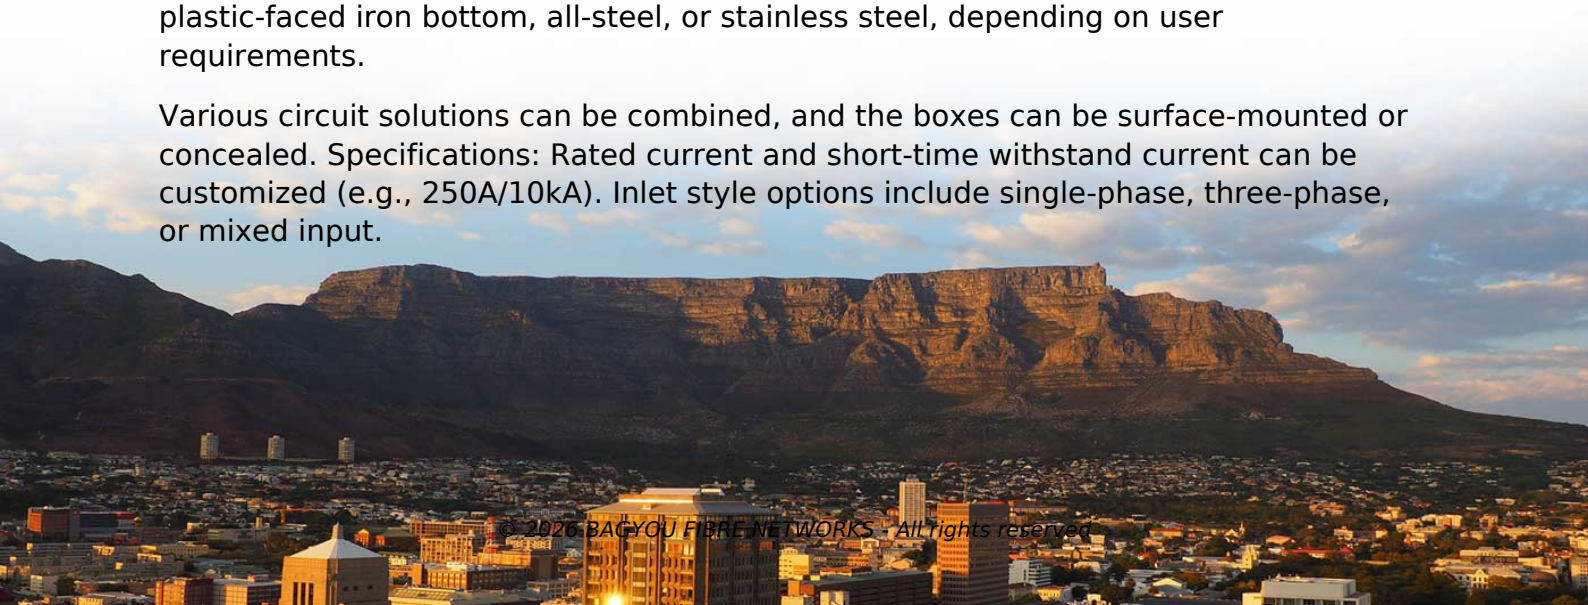

PXT distribution boxes are versatile power distribution units for industrial and commercial use, while PZ boxes, such as the PZ30, are compact lighting and power distribution boxes for residential and commercial circuits.

PXT Distribution Box

Function and Applications: The PXT distribution box is used in power plants, substations, factories, mines, and high-rise buildings for distributing electricity safely and efficiently. It supports AC systems of 400V and below and provides overload, short-circuit, undervoltage, and leakage protection for frequent conversion and low-power lines. It is suitable for lighting, power feed, and other electrical purposes.

Design and Components: PXT boxes include a face cover, box body, transparent cover door, installation rail, conductive bar, incoming line shield, and bus baffle. They also provide neutral line and grounding terminal blocks. The shell can be all-plastic, plastic-faced iron bottom, all-steel, or stainless steel, depending on user requirements.

Various circuit solutions can be combined, and the boxes can be surface-mounted or concealed. Specifications: Rated current and short-time withstand current can be customized (e.g., 250A/10kA). Inlet style options include single-phase, three-phase, or mixed input.

Outlet circuits can be single-phase or three-phase. Main switch type and protection level are configurable (e.g., IP30),.

P

Z Box (PZ30)Function and Applications: The PZ30 lighting distribution box is designed for single-phase and three-phase circuits with a frequency of 50Hz, rated voltage up to 500V, and load current not exceeding 100A. It is used for power and lighting distribution, motor control, and provides overload, leakage, and short-circuit protection. It is widely applied in factories, buildings, residential areas, and shopping malls.

Design and Components: PZ30 boxes are constructed with 1. 0mm thick high-quality steel plates and feature high-voltage electrostatic spray coating. They have a transparent plastic cover, pre-punched knockouts for cable entry/exit, and flame-retardant materials.

The design allows heat dissipation, structural strength, and easy modification, making it suitable for future expansion. Standards Compliance: PZ30 boxes comply with GB7251. 3 and IEC 60439-3, ensuring safety and reliability for ordinary users.

Key DifferencesFeaturePXT Distribution BoxPZ30 BoxVoltageAC 400V and belowAC 500V and belowCurrent CapacityCustomizable, higher industrial ratingsUp to 100AApplicationsIndustrial, commercial, high-rise buildingsResidential, commercial, small industrial circuitsProtectionOverload, short-circuit, undervoltage, leakageOverload, leakage, short-circuitInstallationSurface-mounted or concealedCompact, easy modification, pre-punched for cablesMaterialPlastic, steel, stainless steel1. 0mm steel, flame-retardant, transparent coverStandardsIEC60439-1, GB7251. 3GB7251.

3, IEC 60439-3Both PXT and PZ boxes are essential for safe and organized electrical distribution, but PXT is more suited for heavy-duty industrial applications, while PZ30 is ideal for compact, flexible lighting and power distribution in residential and commercial settings.

PXTF low-voltage distribution box / PZ lighting distribution box

Applications: Suitable for commercial buildings and residential buildings, used for final distribution of lighting and socket circuits. Advantages: Compact size, flexible installation, clear circuit

CN209823239U

The utility model belongs to the technical field of the block terminal, concretely relates to PXT block terminal.

Products-Products-Shaanxi QT Power Group Co., Ltd.

ATS dual power distribution cabinet is mainly used in emergency power supply system, suitable for AC 50Hz, rated working voltage 400V, rated current 630A and below three-phase three-wire, three

PXT distribution box/lighting metering box-Shaanxi QT Power Group

The main structural components of PXT distribution box/lighting metering box include face cover, box body, transparent cover door, installation rail, conductive bar, incoming line shield and bus baffle,

Pz Flush Mount Electrical Distribution Box

PZ30 flush mount distribution box is a standard indoor concealed wiring enclosure, specially designed to install miniature circuit breakers, leakage protectors and modular electrical components. It applies to

PZ Series Lighting Distribution Box: The "Safety Guardian" of Terminal ...

The PZ Series stands out for its standardization, safety redundancy, and cost-effectiveness. As the "last line of defense" for indoor electricity safety, it ensures stable and secure power for daily life and work

PZ30 Distribution Box

PZ30 lighting distribution box is suitable for frequency 50HZ, rated voltage 500V and below, load current is not greater than 100A single-phase and three-phase circuits, for power and lighting, motor control,

PZ-30 Concealed-Mounted Plastic Panel Distribution Box

The box structure is compatible with the standard PZ30 installation module. The panel of the box is flat and beautiful, and can be completely embedded in the wall, visually unifying with the surrounding
