Power plug of fiber optic router

Overview

The Optical Network Terminal (ONT) is the main connection point between the fibre network and your home. The Power Supply Unit (PSU) is essentially a plug that powers the ONT. If it's unplugged, your broadband stops working, so please. A Fiber Optic Socket Wall Outlet, also called a fiber optic faceplate or optical termination outlet, is a mounted interface designed to house and protect fiber optic terminations, such as SC, LC, or ST connectors. It's typically installed on walls to provide a clean endpoint for incoming fiber drop. To connect your fiber optic cable to a router, ensure you have the following: Fiber optic modem (ONT): Most fiber connections require an Optical Network Terminal (ONT), provided by your ISP. This comprehensive guide combines industry standards with field-tested practices to ensure you achieve a rock-solid.
