Price of 6-core direct-buried optical cable

Overview

Amazon.com: Direct Burial Fiber Optic CableArmored fiber optic cables for underground installation with UV and temperature resistance. Armored 6 core fiber.

Key Takeaways

The price of a 6-core direct-buried optical cable typically ranges from $1. 50 to $5 per meter, depending on fiber type, construction, and additional protective features. Pricing Overview6-core fiber optic cables are available in single-mode (SMF) and multi-mode (MMF) types.

Single-mode cables, designed for long-distance transmission, are generally more expensive than multi-mode cables, which are suitable for shorter distances like campus networks or data centers. Direct-buried cables often include armored construction with steel tape or aramid layers to resist crushing, rodent damage, and moisture, which can increase the price by 20–50% compared to non-armored variants.

Factors Affecting Cost

Fiber Type: Single-mode (OS1/OS2) vs. multi-mode (OM2/OM3/OM4) affects both performance and price. Cable Construction: Armored cables with steel tape or double sheaths are more durable and suitable for harsh environments, adding to cost. Length and Quantity: Bulk orders reduce per-meter cost, while small orders may be priced higher.

Customization: Options like fiber color, jacket material (PE for outdoor use), and tensile strength can influence pricing. Typical Price RangeSingle-mode 6-core direct-buried cable: Approximately $3–$5 per meter for armored outdoor versions. Multi-mode 6-core direct-buried cable: Approximately $1.

50–$3 per meter, depending on fiber grade and protective features.

Additional Considerations

Installation Costs: Direct burial avoids duct installation but may require trenching or plowing, which adds to total project cost. Total Cost of Ownership: Include splicing, connectors, and future scalability when budgeting, as these can significantly affect long-term expenses. Supplier Variability: Prices vary by manufacturer and region; contacting suppliers like Hongan, Corning, or local distributors can provide precise quotes.

For a formal and accurate price, it is recommended to request a quote from suppliers specifying fiber type, cable length, and any additional protective features required for your installation.
