Price of Cable Distribution Box

Overview

Amazon.com: Cable Distribution BoxCheck each product page for other buying options. This product has sustainability features recognized by trusted certific.

Key Takeaways

Cable distribution boxes typically range from $20 for small indoor units to over $3500 for large, weatherproof outdoor enclosures, depending on size, capacity, and features. Price Ranges by Type and SizeSmall indoor distribution boxes: Prices generally start around $20–$100 for compact units suitable for residential or small office installations, with amperage ratings from 32A to 125A and basic IP protection. Medium-sized boxes: For commercial or light industrial use, prices range from $100–$500, often including multiple circuits, surge protection, and higher-quality thermoplastic or metal construction.

Large outdoor or weatherproof boxes: Heavy-duty enclosures with IP66/IP67 ratings, suitable for outdoor or industrial environments, can cost $500–$3500 or more, depending on cable capacity, number of modules, and additional features like PE+N terminals.

Factors Affecting Price

Material and Build Quality: Steel or high-grade thermoplastic enclosures are more expensive than basic plastic units.

P Rating: Higher protection against dust and water ingress (IP65–IP67) increases cost, especially for outdoor installations. Capacity and Modules: Boxes with more circuits or larger cable capacity are priced higher. For example, a 16–50 sq.mm outdoor box can cost over $2000–$8000 VND equivalent.

Special Features: Surge protection, residual current devices, modular designs, and smart monitoring capabilities add to the price. Application Type: Fiber optic distribution boxes for telecom or FTTH networks may have specialized trays and splicing features, typically ranging from $50–$500 depending on size and complexity.

Practical Considerations

Indoor vs Outdoor: Indoor boxes are generally cheaper and simpler, while outdoor boxes require weatherproofing and corrosion resistance. Installation Costs: Professional installation is recommended for larger or high-capacity boxes to ensure safety and compliance with electrical codes. Bulk Purchases: Suppliers often offer discounts for volume orders, which can significantly reduce per-unit cost for large projects.

In summary, reference prices for cable distribution boxes vary widely based on size, material, IP rating, and intended application. Small residential units may cost under $50, while large outdoor or industrial enclosures can exceed $3500, with fiber optic-specific boxes falling in the mid-range depending on features and capacity.
