Key Takeaways

Fire-resistant galvanized cable trays typically range from $50 to $200 per 2–3 meter section, depending on type, load rating, and fire protection features. OverviewFire-resistant cable trays are designed to support electrical and communication cables while preventing the spread of fire. They are commonly used in industrial, commercial, and critical infrastructure projects, including power plants, data centers, oil and gas facilities, and rail systems.

These trays are often made from hot-dip galvanized steel or stainless steel and may include intumescent coatings or powder coatings to enhance fire resistance.

Pricing Guidance
