Price of brickwork for distribution boxes

Overview

Square Foot Pricing Need a custom cost estimate based on other brick sizes or a specific brick price?

Use the Custom Brick Calculator below for more contro.

Key Takeaways

The cost of brickwork for a distribution box typically ranges from $10 to $28 per square foot, including materials and labor, depending on brick type, mortar, and regional labor rates.

Material Costs

Bricks for small masonry enclosures like distribution boxes generally cost $0. 35 to $0. 90 per brick, with bulk purchases of 1,000 bricks ranging from $350 to $900.

Antique or specialty bricks can cost up to $2 per brick. Mortar is an additional cost, with an 80-pound bag covering about 37 standard bricks and costing around $15 per bag.

Labor Costs

Labor to lay bricks adds approximately $5 to $13 per square foot, or $300 to $800 per 1,000 bricks, depending on complexity and local rates. Small projects like distribution boxes may have slightly higher per-unit labor costs due to setup and finishing requirements.

Total Estimated Cost

For a typical distribution box enclosure (roughly 3–4 square feet of wall area per side), the total brickwork cost can be estimated as follows: Materials: $10–$20 per square footLabor: $5–$13 per square footTotal: $15–$28 per square foot This estimate includes standard red or common clay bricks and mortar but excludes additional features like decorative patterns, reinforced concrete bases, or weatherproof coatings.

Factors Affecting Cost

Brick Type: Facing bricks or engineered bricks are more expensive than common bricks. Mortar Type: Specialty mortars for outdoor or weather-resistant enclosures may increase costs. Regional Labor Rates: Urban areas typically have higher labor costs than rural areas.

Delivery Fees: Brick delivery can add $60–$200 per order depending on distance and quantity. Size and Complexity: Larger or more intricate enclosures require more bricks and labor, increasing total cost. By considering these factors, you can budget accurately for constructing a brick enclosure for a distribution box, ensuring both durability and compliance with electrical safety standards.
