Prices for Pigtail Jumper Cables

Overview

Jumper Wires are available at Mouser Electronics. Mouser offers inventory, pricing, & datasheets for Jumper Wires.

Key Takeaways

Pigtail jumper cables typically range from $1 to $15 per piece depending on type, length, and application.

General Pricing Overview

Electronics jumper wires (pre-crimped leads, 8 AWG to 32 AWG, lengths 2”–18”) are usually priced $1–$5 each for standard single-conductor cables, with bulk packs offering lower per-unit costs (DigiKey). Antenna pigtails and jumpers for WiFi, GPS, cellular, and ham radio applications can range from $5–$15 per cable, depending on connector type and length (AIR802). Stranded electric pigtails for grounding or device connections are often sold individually or in packs, with prices starting around $2–$10, and special pricing available for schools, government, or corporate orders (TEquipment).

Wholesale options are available on platforms like Alibaba, where prices can drop significantly for bulk orders, sometimes below $1 per cable depending on quantity and specifications.

Factors Affecting Price

Cable length and gauge – Longer or thicker wires cost more. Connector type – Specialized connectors (e.g., SMA, N-type, or pre-crimped terminals) increase cost. Application – Automotive, industrial, or RF applications may require higher-quality materials, affecting price.
