Quad-lens high beam module

Overview

Raw light output of 11,900 lumens per module, providing visibility up to 380 meters with the long-range beam. Wide beam width of 75 meters for optimal peripheral illumination. What are Thinbilite lighting. Quad beam LED headlights represent a significant segment within this growth, driven by increasing demand for enhanced nighttime driving safety and vehicle aesthetics. Current market valuations place the automotive LED lighting sector in the multi-billion dollar range, with projections indicating a. The LED high beam headlamps of Module 60 LED not only impress with their energy efficiency and powerful light output, they are also particularly durable and resistant to vibrations, dirt, and water thanks to the IP 6K9K and IP 6K7 protection classes. A powerful piece of HELLA quality! Safety. The 1129 Series is High-Beam only and features a classic convex prismatic lens to match the look of the old, sealed beam headlights. It also has great advantage to enable ultra slim headlight design with small modular package.
