Rack-mounted fiber optic cable distribution frame

Overview

This will comprise all components to protect and store the spliced fiber and provide sheath continuity. The distribution frame shall be designed with enough spare capacity for the fiber splices.

Key Takeaways

A rack-mounted fiber optic distribution frame is a vertical, modular rack unit with front and rear access, designed to organize, protect, and manage fiber optic cables and connections.

General Appearance

A typical rack-mounted ODF is a 19-inch steel frame that can range from 1U to 4U in height, depending on fiber capacity and network requirements. It is often painted and made from corrosion-resistant materials for durability. The frame may include detachable side panels and lockable front doors to protect the fibers while allowing easy access for maintenance.

Some models feature an open-frame design for quick access to cables and splice trays.

Key Components

Adapter Plates and Modules: These hold fiber connectors such as LC, SC, ST, FC, E2000, or MTRJ, and can accommodate 24 to 144 adapters per plate. Splice Trays: Provide secure storage for fiber splices, maintaining sheath integrity and preventing damage. Cable Management Accessories: Include fiber management spools, finger guides, and rigid cable rings to route fibers neatly and prevent tangling.

Jumper Management: Modular plates and segmented hubs allow patch cords to be routed efficiently, with gravity-managed slack storage for easy addition or removal of jumpers. Functionality and LayoutRack-mounted ODFs are designed for high-density fiber cross-connects. They allow top or bottom cable entry, and the internal layout is often numbered, lettered, and color-coded for clear identification of connections.

Some frames can be configured side-by-side with integrated cable management between racks, optimizing space in POP buildings or data centers.

Capacity

Depending on the model, a single-frame ODF can support up to 2,880 LC Duplex ports, while dual-frame models can handle up to 5,760 LC Duplex ports. This makes them suitable for both small-scale and large-scale fiber networks.

Summary

In essence, a rack-mounted fiber optic distribution frame looks like a tall, rectangular metal cabinet or open frame, with multiple horizontal shelves or panels for adapters and splices, integrated cable management, and front/rear access for maintenance. Its modular design allows for flexible configuration, high fiber density, and organized routing of optical fibers in professional network environments.

Fiber Optic Patch Panel | ODF Optical Distribution Frame (Rack

Streamline your fiber connectivity with our premium Fiber Optic Patch Panels and ODF systems. Designed for reliability and ease of use, our rack-mount and wall-mount solutions provide the perfect

Fiber Optic Hardware | Fiber Panels, Housings, Racks, and ...

Corning has a wide variety of hardware solutions to choose from to fit your cabling needs. Choose from racks, panels, modules, splice trays, ethernet fiber switches and other structured cabling components.

FTTH 19 inch 1U/2U Rack Mounted Drawer Fiber

It neatly arranges and distributes optical fibers to ensure efficient signal transmission. Made of high quality materials, it provides durability and reliability.

Fiber Optic Distribution Frame 19-inch Rack mounted

Compatible with different fiber optic connector types, such as SC, LC, FC, E2000, and more. The height of the network rack is 2m, 2.2m, 2.6m. Application for

ODF Fiber Optic Patch Panel, ODF Unit Box Manufacturer/Supplier

ODF fiber optic terminal box manufacturerd by UnitekFiber Solution is flexible in configuration, simple in installation, easy to maintain, and is an indispensable device for fiber optic communication cable

Fiber Distribution Frame FDF

Wall-mounted fiber distribution frames are typically designed as box-like structures, ideal for locations with fewer cables and fiber cores. Rack-mounted fiber

19 Inch Rack Mount Fiber Optic Patch Panel | LC SC FC ST Custom

The 19-inch rack mount fiber optic patch panel is engineered to deliver standardized, tidy, and secure fiber termination, distribution, and management. Designed to fit all standard 19-inch

24 Port Optical Distribution Frame Rack Mount ODF

24 Port Optical Distribution Frame ODF, Excellent cost control, far exceeding the sales volume of peers, this is a product loved by customers.

Fiber Optic Products & Accessories Manufacturer/Supplier

UnitekFiber is a professional manufacturer of fiber Indoor/outdoor cables, MPO/MTP fiber patch cords,fiber optic patch panel. SFP optical transceiver, fiber optical connectivity and PLC splitter. Our
