# Request for purchase of beam splitters

## Overview

Shop DigiKey's large in-stock selection of Beamsplitters. View inventory, pricing and order now for same day shipping!Beam splitters are critical for managing optical power flow in a wide range of setups. Selecting the right component involves navigating trade-offs between power handling, polarization sensitivity, chromatic dispersion, and mechanical stability. A beam splitter is an optical device that separates. Our ProFlux® beamsplitters are optimized for 45° and can be used for imaging and non-imaging applications for display products and scientific instruments. Made with highly durable materials, ProFlux products have high performance. Choose from commercial. Beamsplitters (Beam Splitters) are components that split light at a specified point.

## Article Content

Beam Splitters – Buyer''s Guide & Supplier List | RP Photonics

This buyer''s guide for beam splitters provides technical background, comparison of major types, selection criteria, and an overview of suppliers.

Beam splitter, Beamsplitter

Find your beam splitter easily amongst the 62 products from the leading brands (DAHENG OPTICS, COHERENT, EDMUND, ...) on DirectIndustry, the industry

Thorlabs · Optical Beamsplitters

Thorlabs offers a wide range of optical beamsplitters. Our plate beamsplitters have a coated front surface that determines the beam splitting ratio while the back

High-Quality Beam Splitters for Lasers & Research | PhotonExport

Explore a diverse range of high-quality beam splitters at PhotonExport, designed for precision control of light in lasers, illuminations, and research-grade setups. Our custom beam

Beamsplitters | Optics | DigiKey

Shop DigiKey''s large in-stock selection of Beamsplitters. View inventory, pricing and order now for same day shipping!

Beamsplitter

Beamsplitters operate by splitting light based on reflection/transmission (R/T) ratios or specific properties like polarization or wavelength. Available in cube and plate configurations, these versatile

Beamsplitters

Beam splitting cubes, also known as beam splitters, are optical devices used to split a beam of light into two separate beams. These cubes typically consist of two

Optical Beamsplitters | Beamsplitter Selection | Edmund Optics

Light can be split by percentage of overall intensity, wavelength, or polarization state. Edmund Optics offers plate, cube, pellicle, polka dot, or specialty prism Beamsplitters in a variety of anti-reflection

Beam Splitters and Combiners — FindLight

You can request quotes for any listed Beam Splitters and Combiners directly from vendors without registration, streamlining technical evaluation and procurement.

Beam splitter

Beam splitters - precise light splitting for interferometry, spectroscopy and laser optics. Get a free quote now!

What Are Optical Beam Splitters?

What Are Optical Beam Splitters? Key Takeaways Beam splitters, essential for applications such as teleprompters and holograms, have different types that play a vital role in splitting light beams, while

Growth Forecast and Revenue Outlook for Polarization Beam Splitter

*© 2026 BAGYOU FIBRE NETWORKS - All rights reserved*

Polarization Beam Splitters (PBS) and Combiners (PBC) are optical devices that manipulate light based on its polarization state. PBS separates incoming light into two distinct paths—one for ...

Optical Beamsplitters | Beamsplitter Selection | Edmund

Dichroic Beamsplitters, which split light by wavelength, are often used as laser beam combiners or as broadband hot or cold mirrors. Non-Polarizing Beamsplitters,

Beamsplitters Guide: Principles, Types, and Applications

Plate Beam Splitters Non-Polarizing Plate Beamsplitters Non-polarizing plate beamsplitters cover a wavelength range from the UV radiation to the IR radiation, mainly being

How to Select the Perfect Beam Splitter for Your Optical Setup

The amount of reflected and transmitted light depends on the beam splitter''s design and coating. This allows you to control the light distribution in your optical setup. Types of Beam Splitters:

Beamsplitters

Beam splitter cubes are commonly used in various optical instruments and applications, including microscopy, spectroscopy, and laser systems. Other Types: Lateral Displacement Beamsplitters

Beamsplitter Cubes

Split and recombine laser beams or broadband sources with our beamsplitter cubes that offer both polarization insensitivity and high throughput.
