SC interface to lc interface conversion

Overview

An SC-to-LC fiber adapter is an accessory that connects SC-terminated fiber optic cable and LC-terminated fiber optic cable. In these cases, within their casing, they have a special alignment sleeve that aids in the precise joining of the fiber cores. This complete guide gives an insightful explanation of the specifications. If you are upgrading a network switch or deploying fiber to the home (FTTH), you will inevitably face the connector choice: LC vs SC. While both are proven fiber connectors, they are not interchangeable on SFP modules. Choosing the wrong one can lead to costly restocking fees or project delays.
