Safety markings for Level 2 distribution boxes

Overview

Use clear, contrasting colors and large, legible fonts. This helps labels last and stay easy to read. You can also ask a licensed electrician for. formation and meet permanency of marking requirements. Compliance with permanency of marking requirements helps ensure that the labels will adhere to the. The National Fire Protection Association's (NFPA) 79 standard requires enclosures that do not clearly show that they contain electrical devices to be marked with a safety sign in accordance with the ANSI Z535 standards. Given that these standards made the older OSHA sign formats obsolete in 2002. Red, black, and white indicate “Danger” for immediate, life-threatening risks such as high voltage. Orange represents “Warning” for serious hazards like arc flash, while yellow signifies “Caution” for lower-level risks. Electric equipment may not be used unless the following markings have.
