Selection of Ladder-Type Steel Cable Trays

Overview

GUIDE CABLE TRAYS TECHNICAL Specifies requirements for metal cable trays and associated fittings designed for use in accordance with the rules of Canadian.

Key Takeaways

Ladder-type steel cable trays are robust, ventilated support systems designed for heavy-duty cable management, offering high strength, airflow, and modular installation options.

Material and Construction

Ladder trays are typically made from high-strength steel, often with tubular steel rails and stringers for structural support, and may feature galvanized, powder-coated, or painted finishes for corrosion resistance and durability (Legrand, Eaton, Hubbell). The rungs are welded or mechanically fastened to the side rails, providing a rigid framework that supports heavy cable loads over long spans.

Dimensions and Load Capacity

Widths: Commonly range from 100 mm to 600 mm or more, measured outside-to-outside of the side rails (Hubbell). Side Rail Heights: Vary depending on load requirements; higher rails increase load capacity and rigidity (SFSP). Rung Spacing: Typically 300 mm to 500 mm, allowing airflow and easy cable placement.

Load Class: Defined by the tray width, rung spacing, and support span; this determines the maximum cable weight the tray can safely carry (Hubbell).

Design Features

Ventilation: Open ladder design allows airflow, reducing heat buildup in cables (SFSP). Modularity: Straight sections, horizontal and vertical fittings, splices, and covers allow custom routing and expansion (Legrand, Eaton). Supports: Trays can be mounted on floors, walls, ceilings, or equipment racks, with adjustable brackets and hangers for flexibility (Hubbell).

Strain Relief: Ladder trays provide mechanical support to prevent cable sagging and maintain proper bend radius (Hubbell). Standards and ComplianceLadder-type steel cable trays are designed to comply with local and international standards, including NEMA, UL, and CE certifications, ensuring safety, mechanical strength, and electrical grounding requirements (Legrand).

Accessories

Covers: Optional for protection against dust or physical damage. Splices and Connectors: Join straight sections and fittings securely.

J-

Bolt Kits and Mounting Hardware: Facilitate attachment to cabinets, walls, or ceilings (Hubbell). SummaryLadder-type steel cable trays are ideal for industrial, commercial, and data center applications where heavy cable loads, ventilation, and modularity are critical. They provide a strong, durable, and flexible solution for routing power, data, and control cables while maintaining compliance with safety and performance standards.

These specifications ensure that engineers and installers can select the appropriate tray based on load requirements, span distance, environmental conditions, and installation constraints.

Ladder Trays Ladder 3D Drawings Explore our full collection of Metallic Ladder 3D Drawings, including horizontal fittings, vertical fittings and metallic tray.

CABLE TRAY SYSTEMS GUIDE

The design and cost of the cable tray is greatly affected by this designation. In order to determine the most appropriate and economical system, a class should be selected that reflects the actual total

Cable trays

We offer a wide range of cable tray systems to support tubing, electrical cables and instrumentation. Our cable trays are produced in fit for purpose materials like

Choosing the Right Steel Cable Tray: Perforated, Ladder, Mesh

Explore perforated, ladder, wire mesh & flexible steel cable trays. Find the best tray for ventilation, strength & cable protection.

Product Catalogue Cable Management Solutions

Cable ladder is a more reliable, less expensive solution for supporting cable, which is easier to maintain, proves more adaptable to changing needs, and is more suitable for harsh and corrosive environments.

B-Line series Cable Tray Design Considerations

Ladder cable tray is available in widths of 6, 9, 12, 18, 24, 30, 36, 42 and 48 inches with rung spacings of 6, 9, 12 or 18 inches. Note that wider rung spacings and wider cable tray widths decrease the overall

Cable Trays

Find here Cable Trays, Metal Cable Trays manufacturers, suppliers & exporters in India. Get contact details & address of companies manufacturing

Wire Mesh Cable Tray,Cable Ladder, Perforated Cable
