Small busbar processing machine

Overview

Our high-precision busbar equipment integrates cutting, punching, and bending, enhancing efficiency and quality to maintain your market competitiveness.

Key Takeaways

Small busbar processing machines are compact, portable tools designed for cutting, punching, and bending copper or aluminum busbars, ideal for field service and in-plant applications.

Overview

Small busbar processing machines are engineered to handle copper and aluminum busbars efficiently, offering precise cutting, punching, and bending in a single compact unit. These machines are particularly suitable for on-site electrical work, switchgear assembly, and small-scale production, where space and portability are important.

Key Features

Portability: Many models, such as the Gensco UPH series or Rittal CW 120-M, are mobile with castors or trolley bases, allowing flexible use at different workstations. Multi-functionality: Machines often combine cutting, punching, and bending in one system, sometimes referred to as "3-in-1" machines, reducing the need for multiple tools. Precision: Equipped with digital angle indicators, electric protractors, and precision lasers, these machines ensure accurate bends, hole placement, and cuts.

Adjustable capacities: Typical small machines handle copper bars from 10 mm to 200 mm width and thicknesses up to 5/8" (16 mm), with bending angles from 45° to 120° and multiple bending radius adaptors. Punching options: Punch diameters usually range from 6 mm to 21 mm, with adjustable guides for exact positioning. Hydraulic operation: Many small machines use hydraulic systems for consistent force and smooth operation, enhancing efficiency and reducing manual labor.

Popular Models and Solutions

Gensco UPH-120 and UPH-200: Portable hydraulic machines for copper bars, offering precise cutting, punching, and bending with adjustable guides and multiple bending radius adaptors.

Rittal C

W 120-M: Mobile copper workstation with pull-out supports and integral precision laser for ergonomic and accurate busbar processing.

SL

B 125 3-in-1 Busbar Center: Compact unit capable of cutting, punching, and bending copper busbars up to 125 x 13 mm, ideal for switchgear workshops or on-site use.

Advantages

Efficiency: Reduces setup time and manual labor while maintaining high precision. Flexibility: Suitable for both prototype and small-batch production, as well as field service work. Customization: Many manufacturers offer custom molds, patterns, and adjustable settings to meet specific project requirements.

Cost-effective: Compact machines minimize material waste and optimize production for small-scale operations.

Conclusion

Small busbar processing machines provide a versatile, portable, and precise solution for cutting, punching, and bending busbars in both field and in-plant environments. They are ideal for electrical contractors, switchgear manufacturers, and maintenance teams who require high accuracy, flexibility, and efficiency in a compact footprint.

Busbar Fabrication: Machines, Process & Production

Complete busbar manufacturing guide: copper processing steps, fabrication machines (punching, bending, cutting), production line setup, costs &

Busbar Processing Machine Manufacturer & Supplier

Our high-precision busbar equipment integrates cutting, punching, and bending, enhancing efficiency and quality to maintain your market competitiveness.

CNC Busbar Machine Manufacturer & Supplier

CNC busbar machine manufacturer in China, we are committed to providing mature and efficient busbar bending, punching and cutting processing equipment solutions for high and low voltage switchgear

Busbar Machine | CNC Busbar Processing Machine

Our company focuses on the research and manufacturing of CNC busbar processing machines. LT Machinery provides a complete set of solutions for

Busbar Processing Machines

The unique SLB 125 3-in-1 busbar center guarantees effortless cutting, punching and bending of copper busbars up to 125 x 13 mm (4" x 1/2"). Ideal for the switchgear work shop or at a site, the base unit

Busbar Processing Machine

A busbar processing machine is industrial equipment used in electrical switchgear manufacturing to cut, punch, and bend copper busbars. These machines are

Busbar Processing Machines (Busbar Bending / Busbar Punching)

Gensco offers a selection of small, easily portable hydraulic tools for cutting, punching and bending busbar. Ideal for field service work and in plant requirements.

Portable Bus Bar Machine 200B | Cutting, Bending

Efficient bus bar machine for copper & aluminum. Model 200B offers cutting, bending & punching with compact hydraulic design & high durability.

Products

The 3-in-1 busbar processing machine is our standout model, combining cutting, bending, and punching capabilities in one compact unit. These versatile

Busbar Processing & Installation: Your Ultimate Guide

© 2026 BAGYOU FIBRE NETWORKS - All rights reserved

These guidelines govern the busbar processing and installation procedures for all low-voltage switchgear and power distribution enclosures manufactured by our facility. The principles

New & Used Busbar Processing Machine for sale. Lijian CNC Machinery ...

Search for used busbar processing machine. Find Lijian CNC Machinery, Allen-Bradley, Crippa, SR-Tech, Aiko, TMAXCN, and Wadjay for sale on Machinio.

What Affects Busbar Machine Price in 2026

Suzhou Kiande is a trusted company for busbar machines and smart production solutions. Knowing these things helps you make good choices. You can get the best value for your busbar
