# Specifications for polymer cable trays in Papua New Guinea

## Overview

We offer Cable Tray in Papua New Guinea in different specifications at competitive market prices. Our range is customized and passes stringent quality tests, before reaching the market.

## Key Takeaways

Polymer cable trays in Papua New Guinea are typically made from durable PVC, offering corrosion resistance, flexibility, and compliance with industry safety standards.

### Material and Durability

Polymer cable trays are primarily manufactured from high-grade PVC, which provides resistance to rust, chemicals, and corrosion, making them suitable for harsh environments and outdoor installations. The material is lightweight, allowing for easy handling and installation, and is resilient for long-term reliability. These trays are also designed to protect electrical cables from environmental degradation and mechanical damage.

Configurations and SizesPVC and polymer cable trays are available in various sizes, shapes, and configurations, including perforated, ladder, and solid-bottom designs. They can be cut, drilled, and joined on-site, allowing for flexible routing and adaptation to specific project requirements. Modular designs are common, enabling easy expansion or modification of cable management systems.

### Load Capacity and Applications

Polymer cable trays are suitable for light to medium load applications, commonly used in buildings, data centers, industrial facilities, and infrastructure projects. Their open or perforated designs provide ventilation for heat dissipation, preventing cable overheating. They are also used in sectors such as construction, mining, and automotive industries.

### Compliance and Safety

These trays are manufactured to meet industry regulations for safety, ensuring proper support and organization of electrical cables. The material's non-conductive nature adds an extra layer of electrical safety, reducing the risk of short circuits or electrical hazards.

### Suppliers in Papua New Guinea

Several manufacturers and suppliers provide polymer cable trays in Papua New Guinea, including Brilltech Engineers Pvt. Ltd., Micro Sheet Crafts, and Jeetmull Jaichandlall (P) Ltd.. They offer customized solutions to meet specific project requirements, including modular designs, corrosion-resistant coatings, and various tray sizes.

### Key Advantages

Corrosion and chemical resistance for harsh environmentsLightweight and easy to installFlexible configurations for complex cable routingDurable and long-lastingNon-conductive for electrical safetyCompliance with industry standards For detailed technical specifications, including load ratings, dimensions, and installation guidelines, it is recommended to contact local suppliers or consult the Department of Works and Highways resources in Papua New Guinea for applicable standards.
