Standardized Fireproof Cable Tray Supplier

Overview

Need a Fire-Rated Cable Tray Supplier? Find solutions for safe, compliant cable systems that protect during a fire.

Key Takeaways

Reliable suppliers of standardized fireproof cable trays include Cablofil, Flamro, Meka, HERMI, and Apex Tray, offering products tested to international fire safety standards with ratings from 30 to 120 minutes.

Key Suppliers and Offerings

Cablofil (Thorne & Derrick UK) Cablofil provides fire-resistant cable trays suitable for low and high voltage cables, including Prysmian FP and Draka Firetuf types. Their trays are tested according to the stringent German DIN 4102-12 standard, with fire tests conducted in ovens up to 1000°C for 30, 60, and 90 minutes. Cablofil trays are widely used in construction, power, oil, gas, petrochemical, rail, and utilities industries.

They recommend using compatible fire-rated accessories like Ellis Patents Phoenix Cable Cleats to maintain system integrity. Flamro Flamro offers fire protection solutions for cables and cable trays, including FLAMMOTECT-A coatings and DG-CR 0. 7 fire protection tape.

These products prevent flame propagation, protect against environmental factors like UV, moisture, and chemicals, and ensure cables remain functional during a fire. Flamro solutions are suitable for high-risk and sensitive areas such as hospitals, airports, power stations, and nuclear facilities. Meka Pro Meka Pro provides over 1,200 fire-tested cable support products, tested according to EN 1363-1 standards.

Their systems ensure electricity supply remains operational during fires, prevent collapse of cable trays, and avoid toxic flue gases. Products are available in various widths and lengths, with E60 and E90 fire ratings, and must be installed following manufacturer instructions for compliance and safety.

HERMI Solutions HERM

I specializes in constructing fire-resistant cable paths with standard or lightweight cable trays. They provide guidance for selecting the most suitable solution for specific installation needs, ensuring compliance with fire safety requirements. Apex Tray Apex Tray supplies fireproof cable trays made from fire-resistant steel or coated with expanding fire-resistant paint.

Their systems may include fire barriers or wraps to prevent fire propagation along cables. Fire ratings range from 30 to 120 minutes, suitable for emergency escape routes, life safety systems, data centers, hospitals, and high-risk industrial areas. Apex Tray emphasizes proper installation and offers technical support and project experience guidance.

Considerations When Choosing a SupplierFire Rating: Ensure the tray meets the required fire duration (30, 60, 90, 120 minutes) for your project. Standards Compliance: Look for DIN, EN, or other recognized fire test standards. Material and Coating: Steel trays or fire-resistant coatings that maintain structural integrity under high temperatures.

Installation Guidance: Suppliers should provide detailed instructions and technical support. Project Experience: Review previous installations in similar environments to ensure reliability. These suppliers provide comprehensive solutions for fireproof cable management, ensuring safety, compliance, and operational continuity in critical installations.
