Swedish cable tray seismic bracing manufacturer

Overview

Seismic Bracing Systems For this reason, as a company producing connection systems in our country which has the fact of earthquakes, we have added seismic.

Key Takeaways

Wibe Group is a leading Swedish manufacturer offering cable trays and support systems suitable for seismic and industrial applications.

Wibe Group

Wibe Group is a prominent Swedish manufacturer of cable trays, ladders, mesh trays, and wall trunking, providing solutions for both commercial and industrial environments. Their product range includes: Metal cable trays and ladders: Robust designs suitable for horizontal and vertical installations, capable of handling heavy cable loads.

GR

P (Glass Fibre Polymer) trays: Non-conductive, corrosion-resistant, and anti-static, ideal for extreme environments such as data centers, nuclear power, and offshore installations. Seismic and critical installation support: Wibe's systems are designed to meet high safety and durability standards, making them suitable for earthquake-prone areas and industrial applications. The company also offers clickable support systems (CLX 3) for fast and efficient installation, which can be adapted for seismic bracing and vertical applications.

Distributors and Local Access

Ahlsell is a Swedish distributor that stocks Wibe products and other cable tray systems, including Sendzimir galvanized ladders and perforated trays suitable for industrial and commercial projects. They provide accessories for mounting, wall brackets, and suspension systems that can be configured for seismic support.

Additional Considerations

When selecting a cable tray system for seismic applications, consider: Load capacity: Ensure the tray and support system can handle the weight of cables during seismic events. Mounting flexibility: Systems with adjustable brackets and vertical/horizontal adaptability improve seismic resilience. Material choice: GRP or galvanized steel trays offer corrosion resistance and structural integrity under stress.

Compliance: Verify that the system meets local seismic codes and industrial standards. For projects requiring turnkey solutions or custom seismic support designs, Wibe Group can provide engineering guidance and tailored components to ensure safety and compliance. Contacting Wibe Group directly is recommended to discuss specific seismic requirements, load calculations, and installation options for your project.

Seismic Bracing Systems

For this reason, as a company producing connection systems in our country which has the fact of earthquakes, we have added seismic suspension systems to our

Electrical, Fixing, Fastening & Support Solutions | nVent CADDY

Seismic Bracing Solutions From design to construction to inspection, the nVent CADDY team keeps our process transparent to ensure a full understanding of the final seismic bracing installation and

Products

These products are designed to carry heavier cable loads compared to the standard perforated cable trays. This product group offers easiness in vertical applications.

Seismic MEP Solutions | Eaton

Eaton''s TOLCO seismic bracing solutions help protect people and non-structural components during an earthquake. For over 60 years, the mechanical, electrical, and fire protection trades have relied on

Seismic Bracing & Force Protection | Gripple

© 2026 BAGYOU FIBRE NETWORKS - All rights reserved

We offer a pre-engineered, time-saving solution which braces and secures non-structural equipment within a building to minimise damage from earthquakes or seismic events.

UNISTRUT Seismic Bracing Solutions

Requirement: Each straight run requires a minimum of (2) transverse braces and (1) longitudinal brace.

Seismic Bracing Systems | nVent CADDY

The innovative line of nVent CADDY Bracing Systems was developed to help keep fire sprinkler systems intact after a seismic event and minimize water damage.

Seismic Bracing

Atkore has a comprehensive line of seismic channels and fittings, along with a complete line of hangers, pipe clamps, concrete inserts, and accessories.

Electrical Wire Mesh and Cable Trays – Apexio Industrial

Cable Trunking Perforated Cable Tray Cable Ladder Seismic Bracing Certified and Compliant Products obtain CE,UL,CUL certification. With perfect qualification certification and strong research and

Cable Tray Market Size, Share, Types, Trends, Report 2035

Cable tray installation in large-scale projects — nuclear plants, petrochemical facilities, and mega data centers — demands specialized equipment, precision surveying, and supplementary

Essential Steps for Cable Tray Installation on Roof

Learn essential steps for cable tray installation on roof, including support systems, material selection, and environmental considerations for optimal performance and durability.

Products

These are cable management systems composed of trays, mounting support systems, direction changing parts, connection parts and fittings with the purpose of carrying and fixing cables safely in

The shake on seismic bracing

© 2026 BAGYOU FIBRE NETWORKS - All rights reserved

Seismic bracing against the wrath of earthquakes is an increasing concern for today''s data-communications and telecommunications cable installer, and efforts to minimize the damage they

Best 5 Cable Tray Manufacturers in Indonesia

Discover the leading cable tray manufacturers in Indonesia, offering high-quality products for industries across construction, energy, and telecommunications. Learn about top companies,

Seismic Bracing Systems

Seismic Bracing Systems Earthquake reality is considered as an important factor in the construction of buildings in residential areas that have to live on active fault lines and modern buildings are

How Cable Trays and Seismic Bracing Systems Mitigate Earthquake

In April 2024, a magnitude 7.4 earthquake struck Hualien, Taiwan, causing widespread infrastructure damage and economic losses. This disaster, like many others, underscores the critical

Seismic bracing cable kit system | MEP cable bracing

Up to 50% faster to install, the seismic bracing cable kit system is designed to suspend equipment and other systems to help minimize damage in a seismic event.
