Temporary power distribution box protective cover

Overview

SmartGuard® clear electrical panel covers protect breaker boxes, load centers & panel boards on the job site. OSHA compliant, puncture-resistant, Made in the USA.

Key Takeaways

Temporary power distribution box protective covers safeguard electrical panels on job sites, ensuring safety, visibility, and compliance with OSHA and UL standards.

Overview

Temporary power distribution box covers are designed to protect breaker boxes, load centers, and panel boards from dust, debris, liquids, and accidental contact during construction, events, or other temporary installations. They are particularly useful for electricians, contractors, HVAC technicians, and other tradespeople who need to maintain safety while keeping panels accessible for inspection or maintenance.

Materials and Features

Clear PV

C Plastic: Most temporary covers are made from transparent, puncture-resistant, and flame-retardant PVC, allowing easy visual inspection without removal. Durability: Covers are water-resistant, self-extinguishing, and designed to withstand job site conditions. Recyclable and Made in the USA: Many products emphasize environmental responsibility and domestic manufacturing.

Adjustable Sizes: Kits are available in various sizes (e.g., 14″ and 20″) and can fit multiple panel openings. Strong Holding Power: Covers stay securely in place, eliminating the need for tape or temporary fasteners. Safety and ComplianceOSHA Compliance: Covers meet OSHA temporary use requirements and ANSI code standards, ensuring worker safety.

UL and AST

M Standards: Many covers comply with UL Standard 514C, ASTM D1790, and ASTM D638, providing verified fire and impact resistance. Temporary Power Regulations: Conventional wall boxes with standard cover plates are not acceptable for temporary power applications. All components must be approved for temporary use, properly marked, and designed to protect cords and cables passing through enclosures.

Practical Benefits

Ease of Inspection: Transparent covers allow inspectors to view panel conditions without removal. Time and Cost Savings: Eliminates the need for tape or disposable solutions, reducing waste and labor. Enhanced Safety: Protects workers from accidental contact with live components and prevents contamination from dust, paint, or drywall.

Examples of ProductsSmartGuard Clear Electrical Panel Covers: Available up to 48″ wide and 96″ long, suitable for temporary use on construction sites. Temporary Power Boxes: Some portable power distribution boxes, like the WESTERN 6506TLSX, can be paired with protective covers for added safety. Using a temporary protective cover ensures compliance with safety regulations, protects equipment, and provides a practical solution for temporary electrical installations.
