Thailand s active optical device OSFP

Overview

About Company: Genuine Optics is world-leading optical transceiver provider. The company is registered in San Jose, California, with new buildout manufactory in Thailand.

Key Takeaways

Thailand hosts manufacturing facilities for OSFP optical transceivers, supporting high-speed data rates up to 1. 6 Tbps, produced by companies like Accelight Technologies and Genuine Optics.

OSFP Overview

The OSF

P (Octal Small Form Factor Pluggable) is a pluggable optical transceiver form factor designed for high-speed data transmission in data centers and telecommunication networks.

Standard OSF

P modules feature 8 high-speed electrical lanes, supporting data rates of 400 Gbps (8x50G), 800 Gbps (8x100G), and 1. 6 Tbps (8x200G). Variants include the OSFP-RHS, which requires an external heatsink, and the OSFP-XD, which doubles the lane count to 16 for higher density and supports up to 3.

2 Tbps.

OSF

P and OSFP-XD are not cross-compatible due to mechanical and electrical differences (OSFPmsa).

Thailand-

Based Manufacturers

Accelight Technologies, Inc. (ATI)Operates manufacturing facilities in Thailand alongside China, with R&D centers in Wuhan and Silicon Valley. Produces 100G, 400G, 800G, and 1. 6T optical transceivers, including active OSFP modules for data centers, AI optical computing, and telecommunication networks.

Focuses on active transceivers, optical passive modules, and amplifiers, supporting high-speed data exchange and AI-driven applications (Accelight Technologies).

Genuine Optics

Registered in San Jose, California, with a new manufacturing buildout in Thailand. Specializes in low-power, high-speed optical transceivers, including OSFP modules suitable for data center and telecom applications (Genuine Optics).

Applications and Advantages

Data Centers: OSFP modules enable high-capacity interconnects between servers and storage systems, supporting AI and cloud computing workloads. Telecommunication Networks: Provide reliable, high-speed optical links for metro and cross-regional networks. Thermal Management: Integrated heatsinks in standard OSFP modules improve thermal performance, while RHS variants allow flexible cooling solutions.

High-

Density Deployment: OSFP-XD modules double port density, optimizing space in 1U front panels for large-scale deployments.

Summary

Thailand plays a significant role in the manufacturing of active OSFP optical devices, with companies like Accelight Technologies and Genuine Optics producing high-speed, high-capacity transceivers for global data center and telecom markets. These modules support 400G to 1. 6T speeds, with advanced variants like OSFP-XD enabling ultra-dense, high-performance optical interconnects.

The Thai facilities contribute to the global supply chain, ensuring quality, scalability, and innovation in optical communications.

genuine optics-world leading optical transceiver

About Company: Genuine Optics is world-leading optical transceiver provider. The company is registered in San Jose, California, with new buildout manufactory in Thailand.

Welcome to OSFPmsa

A: The OSFP is a pluggable form factor with 8x high speed electrical lanes that support up to 400 Gbps (8x50G), 800 Gbps (8x100G), or 1.6 Tbps (8x200G). Up to 36 OSFP ports are supported in 1 U front

Accelight Technologies

Accelight''s OSFP transceiver module is designed for use in 800 Gigabit links over 500m single mode fiber. The module has 8 independent electrical input/output channels operating up to 106.25Gbps per

TE CONNECTIVITY OPTICS SOLUTION GUIDE

* OSFP-RHS (Riding Heat Sink), optimized for liquid-cooled switches, and OSFP-IHS (Integrated Heat Sink), designed for traditional air-cooled switches, are available in transceiver and AOC variants.

OSFP1600_and_OSFP-XD

The OSFP MSA roadmap provides an excellent mechanical and electrical solution for 800G, 1.6T, and 3.2T pluggable optics with best-in-class thermal performance and support for break-out applications,

OSFP vs. OSFP-XD: 1.6T Transceivers Form Factor Comparison

Comparing OSFP and OSFP-XD in 1.6T transceivers, this article introduces the characteristics and design differences of the two form factors.

Optical Transceiver Module Suppliers from Thailand

Access 71 verified Optical Transceiver Module Suppliers in Thailand with shipment-level prices, volumes, routes, buyer networks, and verified decision-maker contacts — all backed by bills-of-lading.

OSFP Connector System

The Octal Small Form Factor Pluggable (OSFP) Connector System provides single- or dual-port, 8- or 16-lane I/O connectivity with DAC, AOC, ACC and optical modules for high-density switch applications.
