Turbo-Epon Optical Module

Overview

Also known as GEPON, these modules utilize the IEEE 802. 3ah standard to deliver symmetric bandwidth of 1. Because EPON carries Ethernet frames natively without the encapsulation overhead of GPON, it is a highly efficient solution for. Upstream: 1. 25 Gbps (Burst-mode) - The first bit is valid in transmission from all BM transmitters by Zenko Technologies. The products above are in a standard configuration. Depending on the connected devices, PON modules can be classified into Optical Line Terminal modules and Optical Network Unit modules. This guide dives deep into EPON technology, its benefits over alternatives like GPON, and the critical role of optical modules. Coretek PON transceivers comply to Multiple Supplier Agreements (MSA) in each form factor to include Small Form Factor (SFF), Small Form-factor Pluggable (SFP) and XFP. Both Optical Network Unit. Deploy cost-effective and efficient Fiber-to-the-Home networks with our range of EPON (Ethernet Passive Optical Network) transceivers.
