UK Gigabit Bidi Optical Module

Overview

The SFP-GE-LX20-SM1490-BIDI Optical Module is a high-performance networking component that excels in Gigabit single mode single fiber applications. 25G, it adheres to the SFF-8472 protocol standard, ensuring that it meets industry requirements for reliability and. Enable bi-directional fibre optic transmission on your network switches, routers, security appliances and more using a single strand of fibre. The Advance Gigabit Bi-Directional (Bi-Di) SFP Module by Advance is fully tested to ensure 100% compliance with all our listed vendor switches, routers. BiDi transceiver, a compact optical transceiver with WDM (wavelength division multiplexing) technology and SFP multi-source protocol (MSA) compliance, allows fast data transmission using a single fiber optic for both sending and receiving signals, saving resources and cutting infrastructure costs. GIGALIGHT's 1G BiDi SFP series optical transceiver.
