Which company owns the GPON user terminal equipment

Overview

All about our OLTs Our plug-and-play OLTs (Optical Line Terminal) are high-performing, active Ethernet aggregation devices that serve endpoint for passive optical networks.

Key Takeaways

GPON user terminal equipment (ONTs/ONUs) is primarily manufactured by companies like Huawei, ZTE, Nokia, ADTRAN, Calix, DASAN Zhone, and Casa Systems.

GPO

N (Gigabit Passive Optical Network) user terminals, also known as Optical Network Terminals (ONTs) or Optical Network Units (ONUs), are devices installed at the end-user premises to convert optical signals from the fiber network into electrical signals for internet, voice, and video services. These devices are produced by several leading global technology companies.

Leading Manufacturers

Huawei Technologies: Huawei holds the largest share of the GPON market, offering a comprehensive range of ONTs and OLTs supporting GPON, XG-PON, and XGS-PON technologies. Its products are widely deployed globally due to high quality, extensive R&D, and strategic collaborations with telecom operators.

ZT

© 2026 BAGYOU FIBRE NETWORKS · All rights reserved

E Corporation: ZTE provides flexible and cost-effective GPON solutions, including ONTs and OLTs. The company emphasizes open standards and network interoperability, making it a popular choice in Asia-Pacific and Europe. Nokia Corporation: Nokia manufactures ONTs and OLTs under platforms like Lightspan and Quillion, offering high-capacity and next-generation PON solutions.

Its acquisition of Alcatel-Lucent strengthened its GPON portfolio, particularly for carrier-grade broadband networks.

ADTRA

N, Inc.: ADTRAN provides scalable GPON and XGS-PON platforms for enterprises, wholesale telecoms, and residential customers, focusing on operational efficiency and rapid deployment. Calix, DASAN Zhone, and Casa Systems: These companies offer modular and compact ONTs suitable for urban and multi-tenant deployments, with innovations in energy efficiency, network management, and integration with 5G fronthaul/backhaul.

Market Context

The GPO

N user terminal market is highly competitive, with Huawei leading globally (~36% market share), followed by ZTE (~22%) and Nokia (~20%). These companies continuously innovate to support higher bandwidth demands, including 10G-PON, XGS-PON, and emerging 50G PON technologies. The choice of ONT/ONU often depends on factors like reliability, scalability, compatibility with existing networks, and vendor support.

In summary, GPON user terminal equipment is owned and supplied by major telecom equipment manufacturers, with Huawei, ZTE, and Nokia being the dominant players, complemented by ADTRAN, Calix, DASAN Zhone, and Casa Systems for specialized or regional deployments.

Optical line terminals

Adtran''s highly scalable and flexible OLTs are designed to provide high-speed connectivity to end users and support a wide range of applications and services.

Optical Terminal

Huawei OptiXstar W617C is a GPON upstream Wi-Fi 7 ONU that provides one GE port and 2.4 GHz & 5 GHz Wi-Fi 7 functions on the user side. It can be used for wired access, and Wi-Fi coverage in

Understand GPON Technology

GPON is an alternative to Ethernet switching in campus networking. GPON replaces the traditional three-tier Ethernet design with a two-tier optic network which eliminates access and

8 Leading Gigabit Passive Optical Network Equipment Companies

Discover which companies are spearheading Gigabit Passive Optical Network (GPON) innovation, driving critical market trends, and setting the competitive benchmark for the next generation of fiber

GPON Equipment Market Size, Competitors, Trends & Forecast

This report features 11 companies, including Adtran, Tejas Networks, Nokia Corporation, NEC Corporation, Allied Telesis Inc., Huawei Technologies Co. Ltd., Fujitsu Limited

Leading Brand New ONU & OLT Manufacturers and Market Share

GPON technology plays a crucial role in providing high-capacity fiber backhaul for 5G networks. This has increased investments in ONU & OLT solutions to support low-latency, high

Cisco Catalyst PON Series Switches Hardware Installation Guide

In the downstream direction, the Cisco Catalyst PON Series ONT is connected to various end user devices using the 1 G ports and provides triple-play services such as high-speed internet

Optical network terminals

Our SDX 600 Series offers a comprehensive range of GPON optical network terminals (ONTs), from feature-rich, multiport solutions to ultra-compact, pluggable SFPs.

Leading Brand New ONU & OLT Manufacturers and Market Share

© 2026 BAGYOU FIBRE NETWORKS - All rights reserved

In the rapidly evolving telecommunications landscape, Optical Network Units (ONU) and Optical Line Terminals (OLT) ONU & OLT are pivotal components of Gigabit Passive Optical

GPON: Gigabit Passive Optical Network

GPON called a Gigabit Passive Optical Network, is a point-to-multipoint fiber access network that delivers service to multiple users via fiber

GPON Companies

The research insight on GPON Market highlights the growth strategies of the companies. Know the future scenario, forecast, and current trends in GPON.

GPON: What Is It & How Does It Work? Here''s All You

GPON is a great example. You may have heard this term before but would welcome a little clarification as to what it actually means. In this blog post, we''ll tell you all

GPON Explained: What Is Gigabit Passive Optical Network?

What is GPON? GPON stands for Gigabit Passive Optical Network, a widely used fiber-access technology under the Passive Optical Network (PON) family. Unlike traditional copper-based

Global GPON Equipment Market to Reach USD 73.6 Billion by 2034

According to the latest report by IMARC Group, titled “ GPON Equipment Market Report by Equipment Type (Optical Line Terminal (OLT), Optical Network Terminal (ONT)), End User

GPON OLT Basics and Beyond: A Comprehensive Introduction

A GPON OLT is an Optical Line Terminal device compliant with GPON international standards, operating at 1.25 Gbps upstream / 2.5 Gbps downstream rates, and utilizing

Gigabyte Passive Optical Network (GPON)

GPON Network Architecture OLT – Optical Line Terminal sends and receives data at the service provider''s central office. ODN – Optical Distribution Network includes fiber cables and passive
