Which manufacturers sell fiber optic pigtails

Overview

FS fiber optic pigtails offer a fast way to make fiber optic communication devices in the field by fiber splicing, fully manufactured and tested by industrial standards.

Key Takeaways

Fiber optic pigtails are produced by manufacturers such as OTRANS, Leviton, Molex, Foss Fibre Optics, and Belden. Key Manufacturers and OfferingsOTRANS is a professional fiber optic pigtail manufacturer with over 20 years of experience, producing high-quality single-mode and multimode pigtails in standard LC, SC, FC, and ST interfaces. Their products are widely used in data centers, FTTx, and telecom applications, with bulk production capabilities for large-scale deployments (OTRANS).

Leviton offers fiber optic pigtail kits suitable for mechanical or fusion splicing. They provide both multimode and single-mode fibers with SC, ST, or LC connectors, including premium options with low insertion loss and customizable lengths (Leviton). Molex manufactures optical fiber pigtails for single-mode and multimode applications, emphasizing factory-controlled optical performance.

Their pigtails are ideal for mission-critical backbone applications, such as data center tie cables and low-loss backbone riser cables, available in standard lengths of 1 or 1. 5 meters (Molex). Foss Fibre Optics produces pre-connected fiber cables with all common fiber connectors, offering both standard and custom lengths.

They have extensive experience in trunk networks, FTTH, enterprise, offshore, and power utility applications, focusing on high-quality, long-life components (Foss Fibre Optics). Belden provides fusion splice-on connectors with pigtails, including mass fusion pigtails for ribbonized fibers. Their products offer factory-polished performance with field-termination convenience, suitable for harsh environments and large-scale splicing operations (Belden).

Applications

Fiber optic pigtails are primarily used to connect optical cables to equipment in communication networks. They are essential for mechanical or fusion splicing, enabling reliable connections in data centers, FTTx deployments, telecom networks, and other high-performance optical systems. These manufacturers provide a range of options in terms of fiber type, connector style, and length, allowing network engineers and integrators to select pigtails that meet specific project requirements.
